Comments for Public Posting: Here to share my support for item #6 on the ECCEJR committee meeting today. However, we would like to advocate for a stronger policy with limited exemptions in only hard to decarbonize to advance the most substantial climate benefits by requiring developers to provide proof of technical infeasibility of building electrification instead of categorizing entire building types as electrification-exempt. Other cities like Culver and Glendale are leading and I hope that LA will follow.

Comments for Public Posting: Honorable ECCEJR Committee, My name is Brittany Rivas and I am a stakeholder working in LA city. I am writing you all to support/vote in favor of two motions: Agenda Item 6, #22-0151 and Item 7, #22-1178. These motions are progress towards building electrification and water efficiency. As a city we need to do a lot to make sure our buildings are energy and water efficient while simultaneously keeping people housed and their utilities affordable. I among many others are excited for the potential for this ongoing work. Sincerely, Brittany Rivas
