**Council File No:** 21-1072

**Comments for Public Posting:** As someone who has to drive their bike to the place they want to safely ride, I am for the proposed dedicated bike lanes if they mean none or very limited instances where the rider is forced to ride in traffic. This should be basically an all or nothing endeavor. Some might say something is better than nothing, but in my experience half measures rarely work. Also the goal here should be to make bike riders safe, not to make them feel safer. Thank you. Nicholas Emme, Silver Lake
