Council File No: 20-1449

Comments for Public Posting: I urge the Council to move this motion forward. As a member of the Boyle Heights community, young woman, and person of color, I have seen firsthand the absolute inability for people in our community to find affordable housing. Many people are pushed to the streets as they are not able to afford the ridiculously high rent of LA. Using open lots and properties for emergency housing is A KEY STEP to improving the conditions for people experiencing house less ness. I urge you to, in addition to the housing units proposed in this motion, enforce that each location has equitable and safe access to bathrooms, mobile showers, and healthy HOT food options. I pray as well that local community organizations will be called in to this process to assist with the care our houseless community will need. Thank you Kevin De León for not wasting a moment of the people's time. You are off to a great start.
