Comments for Public Posting: I support the for Motion 24-0602 to Ban & Replace Artificial Turf permanently. I understand the contamination of microplastics in our daily life as a severe threat to human and animal reproduction and life. I don't understand the need for the material when there are other options that are drought resistance and better for the environment. Although there are more actions we can take to reduce the risk of microplastics in our daily life, this is something that can be easily done to reduce it in our water system which again is viable to all life. Please understand the minor changes to reduce plastic usage is far superior to major goals that take time, money, and education.
