Council File No: 24-0011-S4

Comments for Public Posting: I'm a community organizer in Chinatown, 2 of my Toisanese elder relatives live under the potential route by the proposed Broadway Junction and we are all, along with the larger Chinatown community, OPPOSED to this gentrifying development coming through this working class, historic, immigrant community. This is an environmentally unjust and environmentally racist project. The EIR was a fatally flawed document rife with illegal piecemealing, failure to deliver on PROMISED funding plans, and of course, NO TRANSPORTATION STUDY DONE FOR A TRANSPORTATION PROJECT. We support Councilmember Eunisses Hernandez' motion to send the project back to doing a transportation study. This project should not be built period. We need a real, robust, public transit system. Los Angeles isn't even known as a transit city, why would a gondola help that?
