**Comments for Public Posting:** I am urging the Housing and Homelessness Committee to approve the motion to protect renters who have lost income due to the recent fires. When workers lose their income because of fires, they shouldn't also have to fear losing their homes. Delaying action only increases the risk of displacement and deepens economic hardship for those already struggling to recover. If we are serious about building a resilient and equitable Los Angeles, we must ensure that workers affected by disasters have the stability they need to get back on their feet. Approving this motion is a necessary step toward that goal. I urge the committee to move this forward without delay. Thank you.
