**Comments for Public Posting:** My name is Betty and I live under the flight path for the Van Nuys Airport in the hills of Encino. There are days when there are so many jets landing that I can't have a conversation with the person sitting next to me. There are other days when I can read the call numbers off of the planes that are taking off. This noise population has increased significantly as the traffic of private jets has become commercialized. There are times when a jet is taking off or landing every 15-20 seconds. I have sent in many noise complaints to no avail. I did not purchase my home in a flight path area and do not want the noise and population that has accompanied the increase in air traffic. This air traffic has increased so the a few people can have more convenience at the emotional and physical expense of entire neighborhoods. Van Nuys airport is not a commercial airport but is being run as such. I oppose any proposals that in the future increase the size and capacity of the airport by adding additional terminals and leasing to more privately run small commercial carriers.

**Comments for Public Posting:** I am asking that the ill-fated Bonseph-Helinet proposal to be rejected with no contractual rights granted. The City can not approve any more developments that do NOT include mitigation measures to reduce the toxic fumes harming us from VNY.
