

**CITY OF LOS ANGELES**  
**INTER-DEPARTMENTAL MEMORANDUM**

Date: November 14, 2024

To: The Honorable City Council  
c/o City Clerk, Room 395  
Honorable Heather Hutt, Chair, Transportation Committee

From: Laura Rubio-Cornejo, General Manager   
Department of Transportation

Subject: **UPDATED SCHOOL SPEED HUMP PRIORITIZATION METHODOLOGY**

**SUMMARY**

In response to the most recent direction from Council File (CF) [23-0306](#), this report amends the original prioritization methodology to increase the role of equity. This report also provides a ranked list of all schools in the city based on this revised methodology, along with a list of the schools recommended for speed humps and speed tables for the next fiscal year, and provides a full list of uncontrolled marked school crosswalks across arterial streets where speed tables are found to be feasible by the Department.

**RECOMMENDATION**

That the City Council:

1. DIRECT LADOT to install Speed Humps at the 30 locations identified In Attachment A by the start of the 2025-26 school year.
2. RECEIVE AND FILE LADOT's prioritized list of 1164 school sites to be used in future years for speed hump feasibility/applicability if future funding is identified.
3. RECEIVE AND FILE LADOT's attached list of uncontrolled school crosswalks across arterial streets where speed tables are feasible and preliminary cost estimates for implementation of such.

**BACKGROUND**

In May 2023, Council directed LADOT to report on the feasibility of establishing a dedicated speed hump program for all schools, including the required funding and staffing resources, and a timeline for execution.

In July 2023, Council approved LADOT's recommendation to implement speed humps on 100 street segments at the Top 50 schools identified by the Safe Routes to School strategic plan in Fiscal year 2023-2024. Council further directed LADOT to provide recommendations to prioritize additional schools in future fiscal years, including any additional staff and resources required to continue the annual school speed hump program.

In August 2024, Council approved LADOT's revised prioritization methodology, as detailed in its report dated April 8, 2024, with amendments to increase the equity indicator weight to 20% and reduce the safety indicator to 55%, in order to to rank schools based on their need for street safety improvements.

Council further directed LADOT to report with a ranked list of the schools in the City based on the revised methodology, a prioritized list of the schools recommended for speed humps and speed tables for next fiscal year, and a full list of uncontrolled school crosswalks across arterial streets where speed tables are feasible and the cost to install them.

LADOT applied the approved revised methodology to identify and prioritize school locations in future fiscal years. This methodology incorporates updated safety data, the need for speed reduction measures such as speed humps and tables, and additional key indicators such as equity, number of kids walking and/or biking to schools, and the lack of existing infrastructure such as walkable sidewalks.

## DISCUSSION

As directed by Council, LADOT set the equity indicator to 20%, the safety indicator to 55%, and applied the revised methodology as outlined below. This resulted in a final ranking of 1,164 schools as shown in Attachment C.

Indicators	Description	Weight
Safety	Safety score (as further described below)	55
Equity	City Planning's Community Health and Equity Index	20
Lack of Infrastructure	Presence of sidewalks along route to school	15
Mode Split	Percent of students that are walking/biking to school	10

The City's Fiscal Year 2024-2025 budget allocated \$1,245,366 to install speed humps and speed tables at elementary schools. With this funding, LADOT can construct speed humps/speed tables at 30 schools. To identify these locations. In response to council direction we provided a list of all schools in the City, this included schools that already had speed humps. LADOT reviewed the prioritized list of schools for locations where speed humps or tables were already installed. At locations without speed humps and/or tables LADOT applied feasibility criteria, including posted speed limits, existing volumes, and the number of travel lanes, to confirm eligibility. Schools with streets that are not eligible to receive speed humps or speed tables and are ranked above the schools with streets that meet the eligibility criteria will be further assessed for other safety treatments. This prioritized list of the 30 Schools for speed hump implementation by the start of the 2025-26 school year can be found in Attachment A.

As directed by Council, LADOT also identified 66 marked uncontrolled school crosswalks that do not currently have any controls funded or planned in the next three years, across arterial streets where speed tables are feasible. This list can be found in Attachment B. The cost to install all listed speed tables is approximately \$3,300,000, with an average cost of \$50,000 per location. LADOT currently does not have funding for the implementation of these Speed Tables.

## FISCAL IMPACT

There is no impact on the City's General Fund. The prioritized school locations for Speed Hump/ Speed Table Installation listed in Attachment A are funded by the Local Transportation Fund in the 2024-25 Adopted Budget (\$1,245,366 for Arterial Speed Management - Schools).
