**Council File No:** 12-0460-S4

**Comments for Public Posting:** It is time for ELECTED officials to start listening to the people who elected them and not the big money developers. It seems all politicians hear is the money jangling in developers pockets- YOU have a responsibility to LISTEN to the voices of the residents of the communities you represent- STOP running over the people who live in the communities you represent- STOP your headlong rush to sell out our communities- Since the City does very little outreach into the affected communities, it is up to the local entities to do outreach and it takes time- this Council needs to give the communities time to respond on items which affect the livability of their community-
