**Comments for Public Posting:** I urge the City Council to discontinue the extended home sharing and then consider eliminating the home sharing itself. These home sharing places have not enriched wonderful neighborhoods instead have done the complete opposite to the permanent residents who live here. They only enrich the homeowners who are concerned about filling their own pockets as you can clearly see from all the postings on this website. The homeowners and their home sharing visitors could care less about the neighbors or neighborhood. We did not purchase our home to be next to a makeshift motel/hotel/hostel where people come and go all day & night and party or do drugs with no regard or respect for the neighborhood especially the neighbors living right next door to them. Even discussing issues with the homeowner and reporting to the City Home Sharing has produced no results. Before issuing home sharing permits, unanimous written approval should be given to the City by the neighbors on all sides of the proposed home sharing residence. We were never asked our opinion and were subjected to noise, drugs, parties, street parking shortages, strangers coming and going, etc. This was a nightmare to our once serene area. Instead of enriching communities, home sharing is actually undermining communities. Concerned Citizen and Long Time San Pedro Resident
