Comments for Public Posting: Estoy en contra del proyecto ensanchamiento de calles, porque eso ocasionaría más tráfico en esas calles y más congestionamiento, más contaminación y también quitarían áreas verdes como los árboles, y los árboles son muy necesarios para vivir con un oxígeno limpio.

Comments for Public Posting: We do not need wider streets, which are dangerous and only increase traffic speed. We need more bike-lanes and bike-paths, and more efficient public transportation. We live in the best city in the world for biking: good weather all year and mostly flat. Please do not widen streets or add parking for automobiles. Use other means to enable transportation in our beautiful city.

Comments for Public Posting: We need to end street widening and automatic street dedications. Wider roads make the City more dangerous, polluted, congested, and costly to maintain. The City's own Mobility Plan 2035 states that wider roads have negative impacts on all of us. Requiring developers to widen roads adds too much to the cost of housing construction. Spot widening has a detrimental effect on our urban forest and often requires street trees to be removed. Wider streets encourage cars to speed through residential neighborhoods. Our streets look poorly designed and incoherent when they are spot widened in just a few places. Thanks

Comments for Public Posting: I strongly support this motion. Automatic street widenings only serve to make our streets more dangerous, our residents more auto-dependent, and weaken the city's commitment to Vision Zero.

Comments for Public Posting: Let's stop pretending that making more room for cars will help alleviate traffic. We need more public transportation and FAST!
