Comments for Public Posting: As we live with the aftermath of park projects and bike paths that have not budgeted for enforcement, some not assigned to any law enforcement agency at all because of land rights and maintenance causing them to be fire hazards as the weeds grow 6' tall while we are continuing to build more and more, I would like to say the city should not continue to build unless these things are budgeted so Recreation and Parks already stressed budget is not expected to handle a larger load without funding and it is clear to the community who will be the enforcement agency is that is responsible for what is build instead of the community having to take that responsibility to figure this out later.
