Comments for Public Posting: Hello and thank you for receiving my email. I live just a few blocks up on Argus Drive and Colorado Blvd. I do not feel safe because these cell towers are quite literally cooking us, frying us, and will give us cancer. We the people and I Diego Galvan from the community do not wish to see this tower go up for any reason whatsoever. Use compassion and empathy. Our health is the top priority and we live here as I've said. We do not allow Version to put up the cell tower, you do not have my consent and you do not have the consent of many other people. Do not give in to what Version wants you to do. Listen to me and we the people because I have lived here for 26 years and others much longer and I and we do not want a cancer giving cell tower built where my children are going to be raised. We do not want this, I do not want this under any circumstance. I will be absolutely crystal clear. I do not want this cell tower. We do not want this cell tower. I firmly believe that this message should be clear enough. We do not want the Version cell tower on Argus and Colorado Blvd in Eagle Rock (90041) going up. We do not want this. I do not want this. You do not have my consent to build a cancer causing tower where I live. There's already enough cancer causing toxins in the world. This cell tower has crossed the line.

Comments for Public Posting: The project is a gross violation of the Colorado Blvd. Specific Plan, a law that was passed to protect our community from reckless, inappropriate development just like this. Surely there is a better place to put a 40 feet cell tower than to plop it right into our neighborhood. More importantly, we never had a chance to voice our opinion. The city did not take protocol to hold a public hearing before approving this project. This is our community, and we have the right to weigh in on decisions that affect it. I was born and raised in Eagle Rock and have lived here most of my life. The preservation and beautification of Eagle Rock is extremely important to me. A giant cell tower will tarnish the charming landscape of our downtown Eagle Rock area. Not to mention the fact that it will lower our property taxes. Studies have also shown the potential health hazards a cell tower can have on us.
