**Comments for Public Posting:** Dear City of Los Angeles Street planning and Department of Transportation, City Council and Mayor, This improvement to move the bike lanes so that the bike lanes on the other side of a protected bollard so that it does not take away any car traffic lanes but definitely makes it safer for bicycles is a no-brainer.. Please implement this plan as soon as possible to avoid any other deaths or injuries of bicyclists on Sunset Boulevard. As a 59 year resident of Los Angeles, born and raised and I attended and graduated from Micheltorena Elementary School ON Sunset Blvd and as a person who rides a bicycle; I would like the safety of being able to ride my bicycle. A clean, efficient and healthy mode of transportation. I am also a driver of a car, so I understand the impact and also the need to share lanes for motor vehicles AND bicycles.
