Comments for Public Posting: Extending the Ballona Creek Path is an important goal for transportation equality in Los Angeles. The path along Ballona Creek, available to cyclists, pedestrians, and scooter users currently enables trips safely away from automobile traffic and exhaust. Extending would bring it to more members of our community and more destinations. Los Angeles is mostly flat, mostly has great weather, and is filled with fitness enthusiasts; it should be the cycling capital of the world. Cycling and walking are clean forms of transportation and promote physical health and well-being and should be supported in all possible ways. Please support this initiative.

Comments for Public Posting: Extending the Ballona Creek bike path would allow lower income communities access to job-rich parts of the City, without the need for a car. The corridor parallels Venice Blvd, one of the most dangerous streets for cycling in the city, and part of the City's High Injury Network so building the path would make it safer for cyclists. The project would result in the construction of a new park in one of the most park-poor parts of the city.

Comments for Public Posting: The ballona creek path is one of the most amazing things LA has to offer. We should continue to invest in it and see the extension to Venice and Cochran. It is one of those things that will dramatically improve quality of life once complete.

Comments for Public Posting: I urge the City Council to apply for ATP Cycle 7 funding to extend the Ballona Creek bike path East to Venice and Cochran. The extension would make it possible for people without a car to get to job-rich parts of the City and would add a new park in one of the most park-poor parts of the city. Thank you
