**Comments for Public Posting:** 05/13/24 Outrageous parking accommodations. There should be at least 45 parking spaces. At least one per bedroom + some extra for guest and service person parking. You are not going to force people to use the public transportation that is perceived by most to be unsafe and impractical. You must be healthy and capable to use public transportation, and a large percentage of the population is not. I'd like to hear your response, and not just that some legislature passed a law. This city and this community is not ready and not able to provide reasonable public transportation to its residents. Taking away driving lanes won't make it happen either. Mostly the poor will take public transportation because they have no choice. So, if what you want is a city of poor so that your public transportation vehicles are full, will you give those poor the money to be able to pay for their housing? The fact is that at this time those that take public transportation cannot afford the housing that private enterprise can profitably build. I appreciate the attempt of government to solve societies problems, but trying to solve one problem while causing another is not progress. Thanks for listening. - LDM
