**Comments for Public Posting:** I support this. It will make public transit easier, better, and will encourage more Angelinos to make a greener choice for our city.

**Comments for Public Posting:** First of all I am strongly in support of this. As someone who loves this city and takes public transit as often as I can I often encounter the lack of signal priority for trains like the E and A line as well as buses make taking public transit a less viable option. I would love to drive as little as possible and I'm sure others would too but when the metro doesn't have signal priority it makes it an inefficient way to get around the city meaning I have to drive to get somewhere on time and it's just more cars on the road creating more traffic. We should have a world class transit system. This would be a good step to making that happen.
