Hi I am appealing this decision and this hearing! All along things have been done improperly with regards to this project. 21 units live within 300 feet of this project and we were never once notified on anything! This is not professional or ethical! I would have been at this hearing if I had been properly notified!

Wo  
Appeal to Public Hearing on Final Grading Decision  
eSS

This is an Appeal that opposes the grading decision administered by the Board and Safety Commission on October 17, 2023. The statutory code requires a 30 day advanced notice to owners who live within 300 feet of the proposed grading site. The notice for the public hearing was received on October 16, 2023, and mailed on October 13, 2023 as reflected on the date of the postmark. Thus, the notice was received on the day before the hearing on October 16, 2023 violative of statutory requirements of 30 days advance notice. Subsequently, the hearing should have been rescheduled. This is a request for a rescheduling of the hearing for the proposed grading.}
