Comments for Public Posting: This is yet another so-called 100% affordable apartment building located at 10898, 10898 1/2, and 10900 W Olinda Street in Sun Valley. The community has never been notified about this project. I live on Olinda, which is a densely populated street, mixed with unexplainable industrial and residential zoning that has been a cancer Sun Valley community for over 40 years, and the havoc continues. That's not enough, our community is NEVER timely notified about projects coming to the community, nothing goes through the proper channels. such as SVANC. The Neighborhood Council is supposed to receive these notifications and provided a chance to bring it up to for public input, comments, requests, and a chance to ask questions. But that's not the case. We do not know anything about this and other similar housing projects coming to Sun Valley, we only learn about it here, at the council meetings when everything has already been decided for us for the powers up high. Why? Why isn't our community provided the opportunity to provide input, make requests, have an open and transparent discussion about projects like this? Why is Sun Valley community always being so grossly neglected and discriminated against by the city? because of your negligence and no consideration of public interest, developers like MAMBA 24 LLC is taking advantage of Executive Directive and trying to fly under the radar of the community and get this project done in the fastest way possible, in complete disregard of residents sharing the street with humongous apartment complexes such as Olinda. Why the Sun Valley Area Neighborhood Council was never notified about this project? Our community must be the first to get notified about housing projects like this, especially when Sun Valley seems to be among selected few to share the burden of low income housing for the entire city of LA.
