Comments for Public Posting: The intersection of this intersection in Silver Lake has long been pedestrian and bike unfriendly. It is non functional if you want to traverse to and from the library, the SL Reservoir, the meadow and/or our major shopping center. We are a community which encourages travel other than cars. We need a major modification of this intersection. I have lived in Echo Park/Silver Lake for nearly fifty years. My grandson lives here too. I believe strongly in structuring our City to fight the climate crisis so that there can be a safe future for my grandson. Engineering our transportation corridors to accommodate pedestrians, cyclists, and others to chose to commute without cars is essential to that mission.

Comments for Public Posting: I live near this intersection and use it to walk my dog to the reservoir every day. Every time I cross this street, when the pedestrian light signals, I am nearly hit. Drivers turning right at this light are not able to see pedestrians, and sometimes they don't care. Another driver once cut another car that was waiting for me, so that they can proceed to turn on Silver Lake. It is dangerous, and a completely avoidable mishap. Please, enforce a NO TURN ON RED at this intersection. We need to make Silver Lake and LA City in general, more pedestrian friendly. It's better for the city, better for the climate.
