Comments for Public Posting: I live in San Pedro and I strongly urge the LA City Council to support the Polluters Pay bills that are now moving through the State Assembly and Senate. LA has been devastated by fires repeatedly over the years that have been exacerbated by climate changes brought on by the fossil gas and oil industry. We also suffer from the worst air pollution in the country. The oil and gas companies have known for decades the ill effects of their production and they have protected their profits by fomenting misinformation and supporting politicians who try to shield their interests in crafting laws that protect and subsidize those corporations. We desperately need those companies to pay their fair share of the pollution and climate change burden - otherwise it will solely fall upon our shoulders as residents of LA and California. Thank you!
