Comments for Public Posting: I was amazed to learn we are moving this Gondola project forward without even first considering the transportation alternatives. Dodger Stadium hasn't had a traffic study since 1990?! I fully support councilmember Hernandez's motion. It's frankly shameful that our local government is allowing a few rich actors to drive the agenda in this way. Please conduct a big-picture analysis of the options for improving transportation into Dodger Stadium and Elysian Park. Then engage with the community to implement something democratically instead of letting a few people with money make decisions that affect the public and our public spaces.
