**Comments for Public Posting:** I strongly and passionately urge when the committee is making all of their decisions on the concerns brought forward that the decisions be kept to ILLEGAL operations and not for those residents that choose to share for all their intended purposes. Some of us need extra income to supplement incomes, and some of us love the experience of sharing our homes as I experienced this when I went to Europe where the homes shared made my experience an unforgettable experience. We own our properties and respectfully so as long as we are within the law, no one has the right to restrict our access to our resources by making us register with the police or pay an outrageous amount of money as a fee to an agency with which we can not effectively communicate, or whatever other prohibitive measures are being taken. One BAD APPLE should not spoil Home Sharing for the rest of us
