Comments for Public Posting: Please vote YES on 23-0529. We have to have SOME guardrails in place for the overrunning of broken-down RVs in Los Angeles. We also desperately need to stop the infiltration of gangs using these RVs as a means of posting up to conduct drug deals, prostitution and violent crime in neighborhoods. At least please don't allow them to park in residential neighborhoods where kids and the elderly feel unsafe, and keep them from parking directly in front of the doors of business already struggling to survive. Tax payers deserve better than this. RVs are parking unchallenged for months and now even years in the same spot, often taking up much needed parking spaces - many metered parking spaces - in an already incredibly congested city. Often these RVs have no running water, no usable bathrooms and barely run under their own power. If they are able to run, at least then they can be moved, therefore allowing the occupants to adhere to the same parking laws that all the rest of us citizens must adhere to. Something HAS to be done. Activists (who some, let's be honest, have definite self-interests in keeping people on the street) and proponents of illegal camping in tents on city sidewalks and now permanently parking decrepit RVs on city streets are a very loud minority that we are being held captive by. They are NOT the majority. PLEASE LISTEN TO THE VOICES OF YOUR CONSTITUENCY, not just the voices of activists and those who constantly threaten lawsuits.
