**Comments for Public Posting:** As someone who rides the light rail to go to work and transfers to the metro at 7th street metro center I have missed connections because the light rail gets stopped and waits for cars. It adds significant delay to the route (especially in downtown) and causes the train to be late and take unnecessary time. It is high time this major issue gets fixed. As LA expands its rail network this issue is paramount to gaining higher ridership as these delays dissuade people from taking the train. Trains getting priority is just common sense that needs to be implemented as soon as possible.
