

TO CITY CLERK FOR PLACEMENT ON NEXT
REGULAR COUNCIL AGENDA TO BE POSTED

#51

MOTION

The Sunshine Canyon Community Amenities Trust Fund provides funds for financing community amenities within the City of Los Angeles, within five miles of the Sunshine Canyon Landfill.

An Emergency Vehicle Hybrid Beacon (EVHB) is a traffic control signal that gives the right-of-way to an emergency vehicle. An EVHB provides an additional layer of safety when factors such as sight distance, lack of gaps in traffic, and other signal warrants have not been met. When activated, a flashing yellow light is displayed, alerting approaching drivers that an emergency vehicle will soon enter the roadway. Shortly after, the system shows a solid yellow followed by a solid red, instructing drivers to stop and allow the emergency vehicle to enter into the roadway. As emergency vehicles enter and exit the intersection, the system will show a flashing red, allowing drivers to proceed through the intersection when it is clear to proceed.

Funding was provided for the design of the EVHB in 2023. Design of the EVHB is now complete and further funding is needed for the installation of an EVHB near Fire Station 18 on Balboa Blvd to ensure the safety of motorists and prompt response times to emergency situations.

I THEREFORE MOVE that the Council RESOLVE that \$300,000 in the Sunshine Canyon Community Amenities Trust Fund No, 699-14 be transferred / appropriated to the Department of Transportation's Account 840 for the installation of an EVHB near Fire Station 18 on Balboa Blvd. in Granada Hills

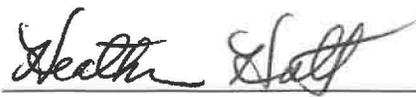

I FURTHER MOVE that the Department of Transportation be authorized to make any technical corrections or clarifications to the above fund transfer instructions in order to effectuate the intent of this motion.
