Council File No: 24-0602

Comments for Public Posting: I wish to encourage support for File 24-0602. Artificial turf is a health and ecological disaster that we shouldn't be brining upon ourselves. It makes a hotter environment and creates massive amount of plastic that there is no way to dispose of. It contaminates people who are on it and in the watershed it is on with forever chemicals that are now in the water supply and are absorbed brought the skin of children and adults that play on it. It is expensive to install, expensive to maintain, requires large amounts of water to make it cool enough to walk on and is going to be disintegrating into the enviormen for decades to come.
