Comments for Public Posting: As a 21 year resident of district 13 who has lived within a quarter mile of the Glendale/Fletcher intersection since 2008, I fully support any proposal that will make this area more viable for pedestrian and bicycle use. This intersection is a monster and it is very intimidating and unsafe to use as a human being who is not in a vehicle. This intersection is not far from the historic red car path, which has been disrupted by developers- when will the city remember that human beings and animals are more valuable than roadways? Please rehabilitate this area by installing accessible and safe sidewalks on all of the roads as well as protected bike paths. Thank you for reading this.

Comments for Public Posting: I am in strong support of robust safety and mobility improvements made at the intersection of Fletcher, Glendale, and Silver Ridge. The intersection is dangerous and stakeholders should not have to take their lives in their hands every time they want to use this intersection on foot or by bike.
