**Comments for Public Posting:** Kelton Planning Gone Wrong! Way Wrong! We don't need more housing, it's enough already! These structures are already clogging up the horizon airspace in places like overland blvd. before venice blvd. with so much housing that never fixes the problem of bums on the street that want to be free to themselves on the streets. The previous worst mayor piled up the homeless on the sidewalks making it a filthy neighborhood. This mayor continues that activity and doesn't listen to the people who know what to do. Their brains messed up on drug use for years have to be given B12 shots or low dose pills and electric sensory starters somewhere around 13 volts more or less. Whatever the brain responds to to work normally again. Certain frequencies can aid in repairing brain cells, but whatever the case they need treatment with sleep and placed somewhere outside the city areas in fast put together tiny homes and/or large facilities. Having this massive structure placed in a neighborhood like kelton and regent is something out of place that doesn't belong. There is empty land dug deep on venice blvd. after sawtelle blvd. that has stayed like that for years. Not saying anything should be built. But why kelton?
