**Comments for Public Posting:** I fully support this initiative. Over the past two redistricting cycles, we've seen the unfortunate loss of some of these crucial assets in the Eighth District. This loss has led to an economic disadvantage, hitting South Los Angeles, an economically fragile community. We must recognize the importance of equity and ensuring that no District is left without assets. The last cycle was terribly unfair- District 9 ended up with many of the assets that should have gone to District 8 and now we know that there were shady things going on in that district that could have been attributed to some of the shady behaviors. We deserve better.
