

MOTION

Sepulveda Boulevard near Valley Meadow Road in Encino is marred by persistent water sheeting – where surface water is consistently laying on top of busy Sepulveda Boulevard – across this busy and high-speed roadway with a significant downhill grade. This creates safety issues, and there have been numerous vehicle crashes at the location over many years. Furthermore, Sepulveda Boulevard has Class II bike lanes and is a popular cycling route, further necessitating an improvement to this section of roadway.

I THEREFORE MOVE that the City Council instruct the Bureau of Engineering to report back, with the assistance of the City Administrative Officer, and any other needed agencies, within 45 days, with an assessment and project delivery plan, including likely funding sources, to curtail the persistent water sheeting issue in the vicinity of Sepulveda Boulevard and Valley Meadow Road.
