Subject: Please Appeal the CPC approval of the Harvard Westlake River Park CPC-2020-1511- VCU-SPR

Dear Mayor, City Council President, and honorable members of the Planning Land Use Management Committee, and City Council.

**THIS PROJECT IS TOO BIG!**

As a Los Angeles resident, I ask you to appeal the City Planning Commission's Approval of the River Park project Case No. CPC-2020-1511-VCU-SPR, ENV-2020-1512-EIR Harvard-Westlake athletic facility project at 4047 – 4155 North Whitsett Avenue; 12506 – 12630 West Valley Spring Lane ("Project"). Although this project is in CD2, this project will be brought to Plum on November 7th, it could possibly be brought to vote by the City Council.

I want to remind you the City Planning Commission had two members who are alumni of the applicant, Harvard Westlake: Commissioner President Samantha Millman and VP Caroline Choe who chose to not recuse themselves. By the way, Ms. Choe is a founding board member of the Harvard-Westlake Korean-American Alumni Network, not exactly as she said, 'far removed' from this project. This project is slated to be utilized for Harvard Westlake alumni fundraising events.

I am among thousands of local residents, environmental groups, recreational groups, and conservationists believe this development is just too big for this massive athletic facility on an area the public has enjoyed with hundreds of mature trees and green open space. I believe this school, in its copious resources, is able to find a better suitable location elsewhere for their extracurricular sports activities.

I am against this project due to the adverse environmental impacts, its limited public use, its potential to host 2000 person events even larger than the Ford Amphitheater (1200 person capacity), inclusion of artificial turf with PFAS forever chemicals, the local climate effect of heat islands created, increased noise pollution, and the burden it will be on the community in its two to three year potential construction time (noise, traffic, respiratory dangers).

Sincerely,

Zip Code:

Subject: Please Appeal the CPC approval of the Harvard Westlake River Park CPC-2020-1511- VCU-SPR  
 Dear Mayor, City Council President, and honorable members of the Planning Land Use Management Committee, and City Council.

As a Los Angeles/Studio City resident, I ask you to appeal the City Planning Commission's Approval of the River Park project Case No. CPC-2020-1511-VCU-SPR, ENV-2020-1512-EIR Harvard-Westlake athletic facility project at [4047 – 4155 North Whitsett Avenue](#); [12506 – 12630 West Valley Spring Lane](#) ("Project"). Although this project is in CD2, it will be brought to PLUM on November 7th, and it could possibly be brought to vote by the City Council.

I am one of the thousands of local residents and members of environmental groups, recreational groups, and conservation groups who believe this massive athletic facility is a terrible idea. It would replace a much-needed green open space, with hundreds of mature trees, that has been enjoyed by the public for many decades.

I strongly oppose this project because of its extensive adverse environmental impacts, its very limited public use, its potential to host 2,000-person events (larger than the Ford Amphitheater's 1,200-person capacity), its planned use of artificial turf with PFAS forever chemicals, the local climate effect of heat islands created, increased noise pollution, and the burden it will place on the community during its potentially two- to three-year construction time. Harvard Westlake, with its extensive resources, should be able to find another location for its sports activities.

Respectfully,  
Gwen Gary  
Wortser Ave  
Studio City, CA 91604

Subject: Please Appeal the CPC approval of the Harvard Westlake River Park CPC-2020-1511- VCU-SPR

Dear Mayor, City Council President, and honorable members of the Planning Land Use Management Committee, and City Council.

**THIS PROJECT IS TOO BIG AND ENVIRONMENTALLY UNSOUND!**

As a Los Angeles resident, I urge you to appeal the City Planning Commission's Approval of the River Park project Case No. CPC-2020-1511-VCU-SPR, ENV-2020-1512-EIR Harvard-Westlake athletic facility project at 4047 – 4155 North Whittsett Avenue; 12506 – 12630 West Valley Spring Lane ("Project"). Although this project is in CD2, this project will be brought to Plum on November 7th, it could possibly be brought to vote by the City Council.

I want to remind you that the approval process was comprised and ethically questionable since two members of the City Planning Commission are alumni of the applicant, Harvard Westlake: Commissioner President Samantha Millman and VP Caroline Choe who chose to not recuse themselves. Additionally Ms. Choe is a founding board member of the Harvard-Westlake Korean-American Alumni Network, not exactly as she said, 'far removed' from this project. This project is slated to be utilized for Harvard Westlake alumni fundraising events.

I am among thousands of local residents, environmentalists, recreational groups, and conservationists who believe this development is just too big for this massive athletic facility on an area the public has enjoyed with hundreds of mature trees and green open space. This open space benefits the health of the city and its residents. Mature trees once lost cannot be replaced. I believe this school, with its copious resources, is able to find a more suitable location for their extracurricular sports activities.

I am opposed to this project due to the adverse environmental impacts, (including harm to wildlife habitat which is already in limited and dwindling supply,) its limited public use, its potential to host 2000 person events even larger than the Ford

Ampitheater (1200 person capacity), inclusion of artificial turf with PFAS forever chemicals, the local climate effect of heat islands created, increased noise pollution, and the burden it will be on the community in its two to three year potential construction time (noise, traffic, respiratory dangers).

Our goal as a city should be to make the city more sustainable and livable for the many. This project is only beneficial to one small school community and harmful to the city at large. Please appeal the CPC approval.

Sincerely,

Erica Silverman

Subject: Please Appeal the CPC approval of the Harvard Westlake River Park CPC-2020-1511-VCU-SPR

Dear Mayor, City Council President, and honorable members of the Planning Land Use Management Committee, and City Council.

THIS PROJECT IS TOO BIG!

As a Los Angeles resident, I ask you to appeal the City Planning Commission's Approval of the River Park project Case No. CPC-2020-1511-VCU-SPR, ENV-2020-1512-EIR Harvard-Westlake athletic facility project at [4047 – 4155 North Whitsett Avenue](#); [12506 – 12630 West Valley Spring Lane](#) ("Project"). Although this project is in CD2, this project will be brought to Plum on November 7th, it could possibly be brought to vote by the City Council.

I want to remind you the City Planning Commission had two members who are alumni of the applicant, Harvard Westlake: Commissioner President Samantha Millman and VP Caroline Choe who chose to not recuse themselves. By the way, Ms. Choe is a founding board member of the Harvard-Westlake Korean-American Alumni Network, not exactly as she said, 'far removed' from this project. This project is slated to be utilized for Harvard Westlake alumni fundraising events.

I am among thousands of local residents, environmental groups, recreational groups, and conservationists believe this development is just too big for this massive athletic facility on an area the public has enjoyed with hundreds of mature trees and green open space. I believe this school, in its copious resources, is able to find a better suitable location elsewhere for their extracurricular sports activities.

I am against this project due to the adverse environmental impacts, its limited public use, its potential to host 2000 person events even larger than the Ford Ampitheater (1200 person capacity), inclusion of artificial turf with PFAS forever chemicals, the local climate effect of heat islands created, increased noise pollution, and the burden it will be on the community in its two to three year potential construction time (noise, traffic, respiratory dangers).

Sincerely,

Olaf Schubert
