Comments for Public Posting: Polluter Pay legislation has already been passed in New York and Vermont. And California is already suing 5 major oil companies for climate damage. The Polluters Pay Superfund is the most reasonable way to hold these companies accountable for the vast damages they have caused us to suffer when they knew better but continued to profit at our expense. In a government that is increasingly unhinged and overreaching, it would be such a relief to hold the oil industry accountable at least. Thank you.

Comments for Public Posting: Subject: Strong Support for Council File 25-0002-S44 — Climate Superfund Legislation (SB 684 & AB 1243) Dear Honorable Council Members, I am writing as a concerned resident of Los Angeles and a strong supporter of environmental resilience and climate justice. I urge you to support Council File 25-0002-S44, introduced by Councilmember Katy Yaroslavsky, which would put the City of Los Angeles on record in support of SB 684 (Menjivar) and AB 1243 (Addis)—the “Polluters Pay Climate Superfund” bills currently before the state legislature. These bills are critically important tools to ensure that fossil fuel companies contribute to the massive costs associated with climate-related disasters—like wildfires, extreme heat, and flooding—that are already affecting our region. For too long, polluters have profited while communities like ours have borne the human, environmental, and financial costs of climate change. This legislation is a common-sense, justice-centered step toward holding those responsible accountable. As climate impacts accelerate, it is vital that LA lead the way in supporting fair and forward-thinking solutions. A strong stance by our city will send a powerful message to Sacramento: Los Angeles is committed to protecting its residents, infrastructure, and future generations by demanding that those who caused the damage help pay for the recovery. I thank you for your consideration and respectfully urge a YES vote on this resolution. Sincerely, Bryan J Garcia

Comments for Public Posting: Please support and pass the Climate Superfund legislation that will require the largest multinational fossil fuel companies (i.e. Chevron, ExxonMobil, Shell) to pay their fair share of climate-related damages based on their documented CO2 emissions from 1990-2004. The fees collected from these polluters will be deposited into a Superfund account, managed by CalEPA, to mitigate existing problems and prevent future climate-related damages across the state. California taxpayers, local municipalities and the state cannot, and should not have to pay for damages associated with extreme heat, wildfires, drought and floods that are attributable to the largest polluters. Thank you.

Comments for Public Posting: Make big polluters pay! They have been trying to weasel out of responsibility for decades. It's time for them to pay their fair share!

Comments for Public Posting: Polluters should pay their fair share of the cost of climate related pollution in California! California citizens and local municipalities should not pay for damages (extreme heat, wildfire, drought and floods) attributable to the largest polluters.

Comments for Public Posting: Please support the Climate Superfund legislation. These polluters have profoundly profited from consumers and federal tax breaks while profoundly harming our planet. They should be held accountable to use their vast resources to clean up the environmental disaster they were pivotal in creating. Thank you.
