Comments for Public Posting: Re: Measure ULA Expenditure Plan, 23-0038-S7 Honorable Council Members, The United to House LA coalition supports the Measure ULA expenditure plan before you. As you know, the ordinance assigns specific allocations to each of the eleven ULA programs. The expenditure plan being considered today aligns with those allocations by "truing up" the imbalances that remain following the Fiscal Year 2023-2024 budget. We are excited for this plan to move forward and for the continuation of ULA investments that will prevent homelessness, build and preserve affordable housing and create good union jobs. In its first year, already ULA has: - Kept 11,000 Angelenos housed through its Short-Term Emergency Assistance (emergency rental assistance) program; - Funded 795 new affordable homes currently under development; - Created 10,000 new union construction jobs responsible for building the affordable housing; - Resourced Stay Housed LA to continue and expand its work to provide eviction prevention and defense services and tenant outreach and education to thousands of tenants each year. - ...and more! We look forward to even more progress in ULA's second year of implementation. On behalf of the United to House LA Steering Committee, Joe Donlin Director, United to House LA
