Comments for Public Posting: As an indangered stakeholder in the historic neighborhood of Solano Canyon "Chavez Ravine" I require clarity in this ERF to include support funding for cleanup and protection from unhoused constituents along the 110 freeway who easily access our residential neighborhood through park trails and walkways that connect the river to Elysian Park. Our neighborhood is under attack by these individuals. This is not an exaggeration. In this new year alone, we have seen over 12 incidents of fires set in the park. If you clear out the river bed they will come to the hills where there is far more danger to wildfire spreading. We consistently see these fires being set at night and our neighborhood is losing sleep and quality of life. Keep in mind there are free utilities for the unhoused in this area and we have been working to get those shut down by Cal Trans and LA Parks. This resolution must include Elysian Park and we need more support to defend and prevent fires caused by the unhoused acting crazy OR just trying to keep warm.
