**Comments for Public Posting:** My family and I wholeheartedly support this project. The TVC will dramatically improve the current conditions and modernize the infrastructure (that is currently very outdated) - while improving pedestrian-oriented conditions and walkability. On the other hand, we believe that the excuses presented by local NIMBY's are truly nonsensical. It seems, some local residents just oppose for the sake of opposing, while making little sense. I guess... they are not aware of a concept of "Infrastructure Improvement" or "Beautification". We salute the developers, architects, and everybody else involved. \*Additionally: we request that the developer improves the sidewalks at this site, - perhaps, pavers should be installed (or something other than the gloomy concrete); thank you. We urge the City to fully endorse the project! Thank you. Your local supporters, Stephanie, Brad, and family!
