SUMMARY

The Department of City Planning (DCP) requests authority to execute a Memorandum of Understanding (MOU) with the Southern California Association of Governments (SCAG) for the Regional Early Action Planning (REAP) 2.0 Subregional Partnership Program grant in an amount not-to-exceed \$6,803,759 commencing on the date of execution and ending on June 30, 2026.

The REAP grant program was established as a result of the \$250 million allocated in the 2019-20 State of California Budget for all regions, cities, and counties to prioritize planning activities that accelerate housing production and meet State and regional housing, transportation, equity, and climate change goals. On September 30, 2020, and December 1, 2020, the DCP and the Housing and Community Investment Department submitted joint applications to SCAG for the REAP grant program and was subsequently awarded \$8,058,000. Of the \$8,058,000 awarded, the DCP accepted and executed an MOU with SCAG in the amount of \$7,028,000 to update and implement long-term housing processes that accelerate housing production. To build off the success of the REAP grant program, California Assembly Bill 140 established the REAP 2.0 grant program in the amount of \$560 million to accelerate infill housing development, reduce vehicle miles traveled, increase housing supply at all affordability levels, affirmatively further fair housing, and implement adopted regional and local plans to achieve these goals. In June 2023, the DCP submitted an application to SCAG for the REAP 2.0 grant program and has since been awarded \$6,803,759 to support the following projects:

1. Accessory Dwelling Unit (ADU) Home Ownership, Accelerating Low-Rise Missing Middle Housing Resource and Visualization Technology, and objective standards for multi-family infill housing in historic districts (\$2,484,351);
2. Housing Element Implementation (\$1,785,486); and,
3. Planning for Housing and Mobility (\$2,533,922).

The DCP states it will utilize the REAP 2.0 grant funds to support existing work programs in its Citywide and Community Planning Bureaus. This work must be performed from July 30, 2024 through June 30, 2026 to be eligible for reimbursement. The grant funds for staff costs associated with the REAP 2.0 Subregional Partnership Program will be dispersed to the DCP on a reimbursement basis and could reimburse up to \$3.2 million in existing salary funding over the grant term. Additionally, the DCP has negotiated a separate payment process with SCAG for contractual services and expense costs associated with the grant work whereby SCAG will release funds to the DCP for the payment of contractor invoices after approval by SCAG and the DCP. This process is the same as the first REAP grant program and eliminates the need for the front funding of these costs. The DCP plans to use existing contracts to conduct the grant work.

FISCAL IMPACT STATEMENT

The recommendations in this report have a positive impact on the General Fund as the Regional Early Action Planning (REAP) 2.0 Subregional Partnership Program grant would reimburse up to \$3.2 million in salary funding for existing work programs. There is no General Fund impact projected from the REAP 2.0 work program contractual services and expenses as SCAG would release funds to the City to make payments without the need for the City to front fund costs. No matching funds are required.

FINANCIAL POLICIES STATEMENT

The recommendations in this report comply with the City's Financial Policies as there is no obligation for current or ongoing matching funds.

Project Description: The project advances City of LA Housing Element Program 103 (Missing Middle); and Programs 58 (Development and Design Standards), 62 (Facilitate Housing Innovation), 63 (Accessory Dwelling Units), 64 (ADU Standard Program). The project outcomes will also serve as a resource for constructing ADUs and using SB 9 and SB 684/1123.

- (2) Infill ADUs Climate Resilience/Fire Safety Analysis - A consultant will prepare a study of the potential impacts of infill ADU development in hillside and Very High Fire Severity Hazard communities, taking into consideration issues such as climate resilience, emergency access and public safety, to inform geo-specific regulations and findings to mitigate potential impacts in these areas and to further support ADU development in areas meeting the REAP 2.0 definition for Infill.
- (3) Low Rise Missing Middle Resource and Website - The Accelerating Low-Rise Missing Middle Housing Resource will model various options for infill development on existing sites to help visualize site planning scenarios, ease development, and expedite approval for low-scale multifamily housing projects by creating informational assets and implementable plan documents. Project Name: Housing Element Implementation

Project Description:

The Project advances Housing Element Programs 47 (Monitor and Report on Housing Production Goals), 48 (Update Density Bonus and Other Citywide Incentive Programs), 62 (Facilitate Housing Innovation), and 121 (RHNA Rezoning) by developing ordinances, tracking rezoning progress, and analyzing environmental impacts.

Throughout the project, outreach will be conducted, including outreach partnerships with community-based organizations. The department will utilize the expenditure budget for digital engagement and physical outreach materials related to the program.

(1) This Project will build upon the existing RHNA Rezoning program efforts by developing new housing programs and their implementing ordinances to streamline the production of housing and facilitate the construction of RHNA targets. This will include the development of an omnibus code amendment which incorporates code amendments to further encourage the construction of missing middle, 100% affordable housing, and develop policy and implementation improvements related to existing state laws. An environmental consultant will conduct CEQA analysis for the program.

(2) To ensure and monitor progress towards rezoning and fair housing goals, software will be used to build out a tracking system and dashboard for program testing, development, and for an annual Housing Progress Report that will be used to inform the City Council regarding the housing pipeline, including unit types, affordability, effectiveness of streamlining and incentive programs, and metrics tracking discretionary applications versus ministerial review.

(3) Furthermore, the project will include an implementation component aimed at establishing new implementation documents and procedures for existing and proposed housing element implementation ordinances.

The final deliverables will be presented to the City Council as an action item with a recommendation to adopt or if applicable approve and pursue recommendations.

Final Deliverables:

- Approved Scopes of Work and RFPs by SCAG
- Housing Progress Report document for the City Council analyzing the housing pipeline, including unit types, affordability, effectiveness of streamlining and

incentive programs, and metrics tracking discretionary land use applications versus ministerial review

- Draft Ordinance(s) released for public comment
- Memo summarizing the number and location of meetings held, attendance, and key themes/feedback from each meeting
- Administrative draft and public review draft zoning ordinance(s)
- City Planning Commission Recommendation Report recommending City Council Adoption of Zoning Code Amendments, final ordinance(s) and meeting minutes
- Documentation of City Planning Commission recommendation and transmittal of ordinance to City Council, with recommendation to consider for adoption within the expenditure period by June 30, 2026
- Copies of Fact Sheets, Forms, and public training materials released. Record of at least ten internal and six public training sessions conducted
- Project metrics

Project Budget: \$1,785,486

Project 3:

Project Name: Planning for Housing and Mobility

Project Description:

This project centralizes resources for housing developers seeking development approvals from the City (Program 57, Improvements to Development Processing, of the Housing Element) and furthers the Housing Element's third goal: a City in which housing creates healthy, livable, sustainable, and resilient communities that improve the lives of all Angelenos.

(1) Task one of this project will produce a Nexus Study with the goal to align off-site street improvement requirements with new development in a way that improves the public realm without creating an undue burden on new housing and especially affordable housing development. In this way, the Nexus Study will create greater certainty for housing developers, remove barriers, and thus lead to an increase in housing production by standardizing street right of way dedications and other offsite improvements required of new development projects. The Nexus Study and Housing Crisis Act (HCA) Analysis will ensure public right-of-way improvements are proportional to project scope and scale and maintain no net loss in residential capacity in line with the HCA (SB 330).

(2) Task two will streamline the permit process and meet mobility and climate goals by modernizing the City's Street Design Manual and standard plans. This initiative aims to establish baseline standards for street and public right-of-way design, promoting context-sensitive design, improving access, safety, and comfort, and enhancing infrastructure to meet community needs. These standards will help affordable housing developers by reducing permit review time and costs, ultimately increasing housing production.

The modernization process includes developing street design typologies based on physical and operational characteristics suited to the City's vision for future development and capital projects, which will be provided to the public in a web portal providing clear, organized, and searchable design requirements for projects in infill areas, as defined by state REAP 2.0 guidelines. This portal will assist housing development applicants in meeting frontage and access pathway improvement requirements.

The final deliverables will be presented to the City Council or other decision-making body with delegated authority as an action item with a recommendation to adopt, or when applicable adopt and pursue the recommendations.

Final Deliverables:

- Approved Scopes of Work and RFPs by SCAG
- Memo summarizing the number and location of meetings held, attendance, and key themes/feedback from each meeting

- Nexus Study and SB330 Analysis Reports to support adoption of new Street Standards by City decisionmakers and the planned update of the City's Highway Dedication and Improvement Ordinance (LAMC Section 12.37)
- Publication of Street Design Web Portal and Site Access Enhancements Design Guidance as a public resource
- Adopted Street Design Manual and Standard Plans
- Documentation of the decision by City Council or delegated decision-making body to adopt the Street Design Manual and Standard Plans within the expenditure period by June 30, 2026. If the decision is made by the City Council or a board or commission, include staff Presentation and Report and the meeting agenda and meeting minutes with the deliverables included as an action item with the recommendation to “adopt”
