**Comments for Public Posting:** I urge requiring plastic foodware accessories only upon request for take out and food delivery because it is not possible to recycle the quantity of plastic currently being used, and it is imperative to reduce landfill that pollutes and puts out emissions that poison our air and contribute to climate change. Thank you

**Comments for Public Posting:** Please require takeout and delivery “extras” — like single-use utensils, straws, condiments, napkins, and more — to be provided only upon request for takeout, delivery, and third-party delivery apps operating in Los Angeles. If someone needs any of these items, they can ask for them. If they do not need them, there is no need for the waste. Switching to an “upon request” model reduces unnecessary waste, pollution, litter, and saves restaurants money. Nationwide, billions of food accessories are thrown away each year, many of which are not even used once. Please grant this Motion, and request the City Attorney to prepare and present a Foodware Accessories Upon Request ordinance, which is a simple step toward a very BIG problem. Let's clean up our act, and skip the stuff!
