**Comments for Public Posting:** Two young girls ran away from Scientology building on I ron Hubbard nov 3, 2023, one was caught by Odo the Scientology guard and taken back , the other ran to a neighbors house and said she was afraid of the police that they were in with Scientology, the girl was manhandled by what was said to be her father and her mother lived 2 hours away it's all documented on YouTube videos by several people, there needs to be on call child advocates for these children escaping from the Scientology buildings. Who will be the hero for these children that are in need of help it was heart breaking to watch the father holding the girl and at times holding her by the back of the neck and she had her head down the whole time, her clothes didn't fit her many sizes too large for her , her posture was in a defeated position never hugging her father, hands held tight to her side. please send the cps into Scientology buildings and checking on all the children there away from the police and staff that are holding them there. Please I'm asking in behalf of the children that have no voice
