Comments for Public Posting: this bill is a long-overdue action which addresses the hidden costs of the continued use of fossil fuels and what should be our efforts to reverse the effects of their use and direct the costs to those responsible.

Comments for Public Posting: It is good policy and governance to spread the cost of wildfires and other climate crisis costs across the board to include the fossil fuel companies whose products are largely responsible for the current crisis. Please support the climate superfund bill currently in the state senate. Thank you, Tessa Bell Silverlake

Comments for Public Posting: Requiring the largest multinational fossil fuel companies doing business in California (i.e. Chevron, Exxon-Mobil, Shell) to pay their fair share of climate-related damages based on their documented CO2 emissions is essential to addressing the climate crisis and building a sustainable planet for ourselves and our children. California taxpayers, local municipalities and the State cannot, and should not have to pay for damages associated with extreme heat, wildfires, drought and floods that are attributable to the largest polluters.

Comments for Public Posting: California taxpayers, local municipalities and the State cannot, and should not have to pay for damages associated with extreme heat, wildfires, drought and floods that are attributable to the largest polluters. The Climate Superfund legislation will require the largest multinational fossil fuel companies doing business in California (i.e. Chevron, Exxon-Mobil, Shell) to pay their fair share of climate-related damages based on their documented CO2 emissions from 1990-2004. These companies have made billions of dollars in profits and can afford to pay for these damages without having to increase prices of gas for consumers. Please make Polluters Pay. We must take action now. The younger generations are begging us to take action now. Please don't disappoint them.

Comments for Public Posting: California tax me you should not have to pay for the damage caused by the oil industry. Enough!
