Comments for Public Posting: I am writing to protect single-family neighborhoods throughout Los Angeles and in support of Draft #3 of the CHIP/Housing Element Rezoning ordinance WITHOUT the included the Exhibit D “options” (Council File 21-1230-S5) that would open up single-family neighborhoods to needless development. The Planning Department, in its report, clearly states that they have identified enough opportunities throughout our city to rezone to meet the State’s mandate for housing without the need to rezone our single-family areas. Here are some facts to consider. 1. The Department of City Planning has already acknowledged that rezoning single-family neighborhoods is not necessary to achieve the housing goals CHIP set out to reach. 2. State law already allows a duplex and two ADUs on each and every residential property. Single-family zones do and will continue to contribute to the housing inventory with thousands of ADUs. 3. Allowing apartments in single-family neighborhoods will not right the wrongs that in the past prevented people from buying homes. Instead, it keeps more people as renters. People need the opportunity to buy affordable homes so they can build generational wealth. Ending single-family zones will take away upward economic mobility from current and future generations of Angelenos. 4. Draft # 3 WITHOUT Exhibit D options already includes a comprehensive plan for adding housing in all our high resource areas on our commercial corridors. If planned correctly new, vibrant neighborhoods can be created in each of our communities that include new affordable single-family homes for sale along corridors that abut existing single-family neighborhoods. We must help families, who have lost hope of owning their own home, achieve that goal. You are deciding on an existential issue affecting hundreds of thousands of Angelenos. I ask you to respect the diversity of housing which makes Los Angeles the remarkable city that it is. Please vote to Approve Draft #3 as recommended by the City Planning Commission, WITHOUT the options contained In Exhibit D. Respectfully, Julio Betbeder S. Orange Dr. 600 Block 90036

Comments for Public Posting: I request that the City Council's Planning and Land Use Management Committee (PLUM) advance Draft #3 of CHIP (City Housing Implementation Program) LA Housing Element as recommended by City Planning without including Exhibit D options. Exhibit D options specifically target single-family neighborhoods for destructive rezoning. Development of multifamily housing should be concentrated along transit corridors and not pop up in the middle of long established neighborhoods zoned for single family homes, ruining the character of those neighborhoods and allowing developers to profit at our expense. The Planning Department, in its report, clearly states that they have identified enough opportunities throughout our city to rezone to meet the State's mandate for housing without the need to rezone our single-family areas. Here are some facts to consider. 1. The Department of City Planning has already acknowledged that rezoning single-family neighborhoods is not necessary to achieve the housing goals CHIP set out to reach. 2. State law already allows a duplex and two ADUs on each and every residential property. Single-family zones do and will continue to contribute to the housing inventory with thousands of ADUs. 3.
