Comments for Public Posting: Hello HODG climate people, (Pegah, can you forward this to all our climate team? Thank you!!) Los Angeles City Council Member, Katy Yaroslavsky, has introduced Council File 25-0002-S44, a resolution in support of The Polluters Pay Climate Superfund bills, SB 684 (Menjivar) and AB 1243 (Addis). We wrote our California assembly members and California state Senators about these bills a few weekends ago when the bills were headed to the assembly and Senate judiciary committees. As of today, no hearing date in either committee has been set because the authors are not sure the bills will get through the respective committees. So please call Zbur and Durazo if you haven't already done this because they are both on the judiciary committees!!!! However, LA city Council in an amazingly proactive move has filed a city council motion in support of this bill. Please submit a public comment using this link: We are asking that you submit a public comment in support of the motion. You can click on this link to add your comment. Your comments can be as short or long as you would like. Express your thoughts about the Climate Superfund legislation and why the City Council should go on record with their support. See below for more information from the Climate Reality project!!! Thank you!!! Polly Sent from my iPhone Begin forwarded message:

To: undisclosed-recipients;; Subject: Action Alert: Support SB 684 (Menjivar) and AB 1243 (Addis); The Polluters Pay Climate Superfund Bills I support SB 684 (Menjivar) and AB 1243 (Addis), The Polluters Pay Climate Superfund bills. I Los Angeles City Council Member, Katy Yaroslavsky for introduced Council File 25-0002-S44, a resolution in support of these critically important bills. If passed, the Climate Superfund legislation will require the largest multinational fossil fuel companies doing business in California (i.e. Chevron, Exxon-Mobil, Shell) to pay their fair share of climate-related damages based on their documented CO2 emissions from 1990-2004. The fees collected from these polluters will be deposited into a Superfund account, managed by CalEPA, to mitigate existing problems and prevent future climate-related damages across the state. California taxpayers, local municipalities and the State cannot, and should not have to pay for damages associated with extreme heat,

wildfires, drought and floods that are attributable to the largest polluters. Fossil fuel polluters have spent \$39 million dollars on lobbyists in an attempt to defeat SB 684 and AB 1243. They say that gas prices will rise, but their hundreds of billions of dollars in retained earn

Comments for Public Posting: Please support the polluters pay climate superfund bill. This bill will make the world's biggest fossil fuel polluters pay their fair share for the climate damages they have caused in California. Californians shouldn't be paying to clean up the mess these polluters made. Please vote YES on the bill to protect communities and invest in California's future. Thank you.

Comments for Public Posting: Hello . I live in the beautiful state of California and I am asking you to support all bills, including SB 684 and AB 124 that protect it. Fossil fuel companies are literally oozing in profit margins while we the California taxpayers continue to pay for the costs of climate damage. Fossil fuels account for nearly 90% of all CO2 emissions and more than 75% of global greenhouse gas (GHG) emissions. Published, peer-reviewed research using polluters' own self-reported data shows that about two-thirds of human-caused CO2 and methane emissions come from just 90 of the world's largest fossil fuel companies. These polluters have profited by producing and selling fossil fuels while externalizing their pollution costs upon California families. Polluters must take responsibility for that burden and pay for the damages their pollution caused! They have the money to do it!!!! Please support these bills and fight, for yourself, your constituents and the future of California. Samantha Follows

Comments for Public Posting: I support this motion whole-heartedly. The Polluters Pay Climate Superfund bills, SB 684 (Menjivar) and AB 1243 (Addis) are important pieces of legislation for California to pass because it proposes to shift the burden of paying for the high costs of climate change recovery from California taxpayers to the businesses that have profited off the fossil fuel industry.
