Council File No: 25-0247

Comments for Public Posting: Please support the motion, and legalize single staircases. We need to make it easier to build new housing and and bring the US in line with its European and Asian peers by legalizing single-stair multifamily buildings. Small plots of land, like the 25- to 75-foot wide lots that most cities and inner suburbs have been carved up into, have become less feasible to develop. Thank you. Stephen Clarke
