Comments for Public Posting: Please VOTE no on this crazy LADWP rate hike. 1). There has been no independent evaluation or investigation done as to why this is needed 2). People were not given sufficient and informed notice. What was sent out to people to vote on was guised under a “propaganda” piece about clean water 3). There has been fraud and no accountability for the LADWP. People in this city are already paying too much and many people are struggling to make ends meet. A 200% over 4 years is incredibly burdensome and many people will not be able to afford to pay their bills. We need a comprehensive study done of the TRUE and real state of the LADWP and then this should be put on the Ballot so people can truly vote on this is a free & fair way instead of Trojan horsing the vote through a propagandist mailer that clearly was sent to try and hide the true nature of what it was about
