Comments for Public Posting: Hello, I am writing to ask that you please pass this legislation in the banning of synthetic turf. Synthetic turf is plastic and plastic is a known pollutant that is harmful to our health and environment. Plastic photodegrades and synthetic turf being made from plastic will be subject to degrading from exposure to light which in turn will cause it to break down into millions of bits and pieces that will end up polluting our waterways, our air and our bodies. For the future of our planet and all living creatures, please pass this legislation. We survived in a world without artificial turf for thousands of years. This is not something that we need to live in this world, but it will certainly impact our ability to do so if the use of synthetic turf is not stopped. Thank you. Kimberly Corona
