Comments for Public Posting: I fully support councilwoman Raman installation of speed tables (23-0204). I live downtown (90013) and these are desperately needed on Broadway and spring st. It would be fantastic if you could elevate the pedestrian crosswalks that already exist. This would improve safety. Thank you for your time. Francisco C.

Comments for Public Posting: Hello, Street widening does nothing to improve traffic; due to induced demand it can actually INCREASE the amount of cars on the road. It also makes the city less walkable/bikable. Ventura & Woodman needs real interventions: accessible curb ramps, shorter crosswalks, wider sidewalks, more street trees, curb extensions, and similar improvements that would make this intersection safer and more pleasant for those utilizing it. Please consider these improvements instead of street widening. Thank you, Markanday
