CENTRAL LOS ANGELES HS #1 AKA METROMEDIA (Continued) **S107736102**

Completed Date:	07/02/2002
Comments:	DTSC has determined that all appropriate response actions have been completed, that all acceptable engineering practices were implemented and that no further removal/remedial action is necessary, specific only to the removal around the underground storage tank. Additional sampling will be conducted post- demolition near on-site hydraulic elevators and residential structures. For Arsenic only. FA for hydraulic elevators and lead

Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	12/12/2001
Comments:	Approximately 136 cubic yards of soil were removed. Based on confirmation sampling, the estimated mean for surface soil based on 95% UCL was 0.860 mg/kg and for subsurface 1.91 mg/kg. Based on this, residual arsenic levels are below the cleanup goal.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	12/07/2001
Comments:	RAW/CEQA - DTSC approved the Removal Action Workplan for the removal of arsenic contaminated soil. CEQA completed.

Click Here:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

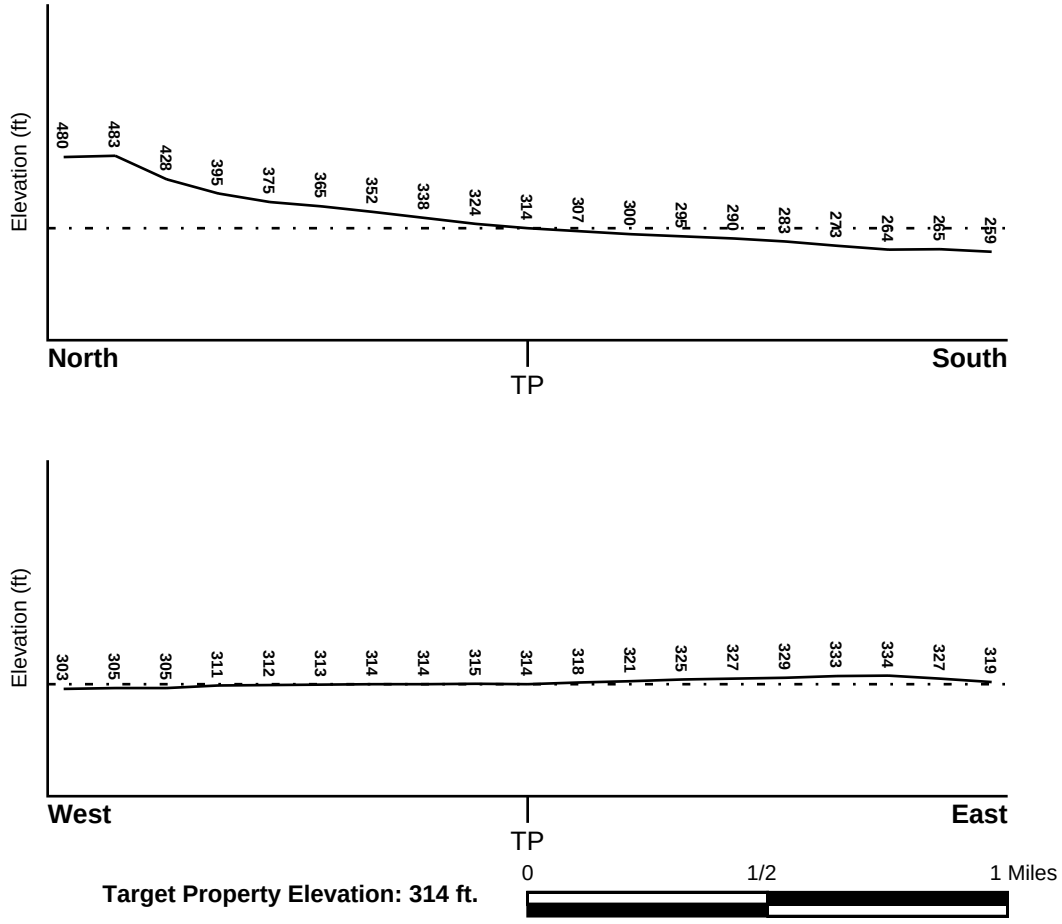
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
I82	1/2 - 1 Mile SW	SW
1G	1/2 - 1 Mile SW	SW

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Inquiry # 6693076.3	Contact: Ginger White

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

ASBESTOS IDENTIFICATION SURVEY

DOLLAR TREE STORES, INC.

CHESAPEAKE, VIRGINIA

Report Prepared/Reviewed By:	**Donald P. Heim, Vice President** **Cliff Swaby, State of California Certified Asbestos Consultant #12-4873**
Management Contact:	**Keith Johnson**
VERTEX Project #:	**30111**
Deal #:	**8470**
Store #:	**N/A**
Site Location:	**1212 Vine Street** **Los Angeles, CA**
Space(s):	**Designated Retail Space, ~ 11,310 SF**
Date of Report:	**August 5, 2014**

INTRODUCTION

In July 2014, The Vertex Companies, Inc. (VERTEX) was retained by Dollar Tree Stores, Inc. to coordinate an Asbestos Identification Survey within the designated retail space (~11,310 SF) located at 1212 Vine Street in Los Angeles, California. The purpose of this survey was to facilitate the planned build-out of the space (renovations) which will require disturbance of existing building materials and not the demolition of the structure.

The inspection was limited to a visual inspection of the aforementioned space to identify the presence, locations and quantity of Asbestos Containing Materials (ACM) or Presumed Asbestos Containing Materials (PACM) in accordance with OSHA's Construction Standard 29 CFR 1926.1101/CCR Title 8, Section 1529.

Bulk samples were collected as part of the survey to confirm/dismiss the presence of asbestos within the suspect materials. This survey was performed on August 4, 2014 by Cliff Swaby, Certified State of California Asbestos Consultant (#12-4873).

Interior finishes include linoleum sheet flooring and 2'x4' ceiling tile. Interior walls consist of drywall and joint compound.

Restrictions and limitations of services detailed in this report are not all inclusive and only attempt to identify existing conditions which must be evaluated prior to any renovation. Renovation operations which impact previously concealed materials must be controlled and halted should suspect ACM be identified. Quantities of ACM/PACM detailed herein are approximations and to be utilized for informational purposes only. This survey report does not represent nor should it be utilized for a bid specification for asbestos abatement.

RESULTS

Results indicate that **no asbestos containing materials** were identified within the designated space inspected.

RESTRICTIONS

Restrictions to VERTEX's Asbestos Identification Survey include:

- The survey was limited to exposed building materials only. Destructive sampling was not performed to identify or confirm suspect materials within concealed areas.
- No inspection/sampling was performed inside enclosed ceilings/walls, inside equipment (i.e. HVAC system), on stored materials or other permanent building structures.
- No inspection/sampling was performed on roofing materials/exterior (voiding of warranties).
- No inspection/sampling was performed below finished grade.

Note: Suspect materials which may exist in areas identified in the above restrictions should be considered as Presumed Asbestos Containing Materials (PACM). Further evaluation should be made of suspect materials prior to any renovation, construction or demolition project. A more detailed presentation of the results of the Asbestos Identification Survey is found in the attached tables.

SAMPLING METHODOLOGY

Bulk samples were collected and analyzed in order to determine the identity of suspect materials and their composition in accordance with applicable state/federal/local regulations. The purpose of the survey was to identify all accessible ACMs within the designated space.

Bulk samples were grouped into homogenous sampling areas. A homogenous sampling area contains suspect asbestos materials that are uniform in texture, appearance, time of installation, and is unlikely to consist of more than one type or formulation of material. Per AHERA protocol, if any sample within the homogenous sampling area has greater than 1% by weight, then the entire sampling area is assumed to containing asbestos.

Note: Where applicable, Cal-OSHA mandates that material(s) found to contain one tenth of 1% or greater of asbestos by weight as determined by PLM analysis be treated as an Asbestos Containing Construction Material (ACCM) and are subject to regulation under CCR Title 8, Section 1529. Trace materials found during this inspection can be re-analyzed through point counting. Should this analysis find levels below one tenth of 1%, the material can be removed and disposed of as construction debris.

Bulk samples were collected from suspect asbestos containing materials. Representative core samples of each material were collected by penetrating the material to its substrate. Each sample and location was incorporated into a sampling log and chain of custody for each sample was documented. All samples were placed in sealed containers and labeled with an identifying code.

Bulk samples were analyzed by LA Testing of Garden Grove, CA (NIST Accredited) via Polarized Light Microscopy (PLM) in accordance with US Environmental Protection Agency (EPA) Method 600R/R-93/116 and/or EPA Method 600/M4-82-020. PLM is the reference method of analysis to demonstrate that presumed asbestos containing materials do not contain asbestos per OSHA's Construction Standard (29 CFR 1926.1101) and EPA's Asbestos Hazard Emergency Response Act (40 CFR 763, Subpart E). The detection limit of the PLM referenced method is one percent (1%) asbestos.

LA Testing is accredited through the National Voluntary Laboratory Accreditation Program (Lab Code #101384-0). Please refer to the attachments of the report which includes the laboratory results.

PLM is not consistently reliable in detecting asbestos in floor coverings and similar Non-Friable Organically Bound (NOB) materials. Fiber size (both length & diameter) of NOBs is frequently very small limiting fiber detection by PLM optics. Fibers are also tightly bound in the matrix of NOBs obscuring their detection. Confirmatory TEM analysis of NOB samples with negative or "inconclusive" asbestos content by PLM is not required in the State of California and was not requested by the client or included in the scope of services for this project.

LIMITATIONS AND SERVICE CONSTRAINTS

Professional opinions presented in this report are based on information made available to VERTEX either by review of data provided by others or data gained by inspection personnel.

VERTEX affirms that data gathered and presented in this report was collected in an appropriate manner in accordance with generally accepted methods and practices. Conditions described in this report were observed at the time of the investigation, unless otherwise stated.

Exploratory demolition was performed, to the extent feasible, in all permanent ceilings, walls and/or other structures.

Reasonable effort was made by licensed personnel to locate and sample suspect materials within the designated space. However, for any facility, the existence of unique or concealed ACMs and debris is a possibility. VERTEX does not warrant, guarantee or profess to have the ability to locate or identify all ACMs in a facility.

The intent of this report is to be used in planning for renovation activity. If ACMs are discovered during demolition related activities, these materials should be removed and disposed of in accordance with all local, state and federal regulations prior to any demolition-related activities. Abatement of ACM must be performed by an accredited/certified/licensed asbestos-abatement contractor prior to disturbance.

Inspection personnel analyzed only the substances, conditions, and locations described in the report at the time indicated.

VERTEX retains the right to revise this report if new information is later discovered or made available.

The report must be presented in its entirety.

CONCLUSIONS AND RECOMMENDATIONS

An asbestos containing materials (ACM) inspection was conducted within the designated retail space (~11,310 SF) located at 1212 Vine Street in Los Angeles, California. This inspection was performed on August 4, 2014 by Cliff Swaby, State of California Certified Asbestos Consultant (#12-4873).

Through the sampling and analysis of suspect materials, **no ACMs** were found to exist within the designated space.

If suspect materials are discovered during future renovation activities, VERTEX recommends collecting/analyzing samples of the materials for asbestos content prior to disturbance.

Executive Summary

MIG Real Estate (the User) retained Roux Associates, Inc. (Roux) to perform a Phase I Environmental Site Assessment (ESA) of the property located at 1212 and 1218 Vine Street, Los Angeles, California, Assessor Parcel Numbers (APN) 5534-002-023 and 5534-002-018 (the Site). Roux performed this Phase I ESA in general accordance with the American Society for Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13) in an effort to identify, to the extent feasible, the presence of recognized environmental conditions (RECs) with respect to the Site as defined in ASTM E1527-13. Exceptions to, or deletions from, this practice are described in Section [9.1] of this report.

Based on Roux's review of historical sources, the Site was undeveloped and vacant until the late 1910s. By 1919, the Site was developed with several structures. Based on several EDR City Directory listings, the Site has historically been used as an automobile mechanic shop, car washing facility, and for media production. By 1981, both present-day buildings were developed. According to Mr. Howard Entin, Managing Partner of 1200 Vine Street Property, LP, owners of the Site, Amatron Electronics, a retail/wholesale electronics store, occupied the entirety of the Site from prior to 1996 through 2000. The Site has been occupied by Goodwill from 2000 to present. Dollar Tree has been a Site tenant since 2014. Since at least 1996 the Site has been exclusively used for commercial retail purposes. The Site is located in a mixed commercial and residential area of the City of Los Angeles.

On October 22, 2020, Roux visually assessed the Site during the site reconnaissance for potential RECs, including, but not limited to, potential underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyl (PCB)-containing equipment, hazardous materials storage or handling areas, containerized or bulk wastes, and visual indications of impacted soil.

Roux also performed a records review in an effort to identify RECs in connection with the Site. This records review addressed the Site and surrounding properties. Roux reviewed commercially available records associated with the Site and nearby properties to assess potential concerns associated with the migration of hazardous substances. The records review also included reasonably ascertainable historical data, which can be helpful in identifying the past uses of the Site and surrounding areas, as it may relate to the environmental condition of the Site.

Roux performed interviews and/or file reviews with various government agencies and other parties with possible knowledge of the Site and surrounding properties in an effort to identify current and past uses of the Site and surrounding areas, as they may relate to the environmental condition of the Site.

ASTM E 1527-13 defines a Recognized Environmental Condition (REC) as:

> "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

A Controlled Recognized Environmental Condition (cREC) as:

> "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

And a Historical Recognized Environmental Condition (hREC) as:

> "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a *recognized* environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition."

The term recognized environmental condition is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Executive Summary provides a brief overview of the findings of this Phase I ESA. Although the Executive Summary is an integral part of a report, it does not substitute for reading the entire report or the appended or referenced documents in order to fully understand the findings and potential environmental concerns associated with the Site.

Based on the information obtained through the performance of this ESA:

- Roux did not identify RECs in connection with the current and historical operations at the Site or adjacent properties.
- Roux did not identify cRECs in connection with the current and historical operations at the Site or adjacent properties.
- Roux did not identify hRECs in connection with the current and historical operations at the Site or adjacent properties.

The term recognized environmental condition is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Other environmental features (OEFs) are environmental conditions that do not meet the definition of a REC, but which may warrant mention in a comprehensive Phase I ESA. Based on the subject Phase I ESA, Roux identified the following OEFs. To the extent possible, the locations of the OEFs are shown in Figure 2.

OEF 1 - Snow White Cleaners (1246 Vine Street). The Snow White Cleaners facility is located at 1246 Vine Street, approximately 320 feet north of the Site. According to EnviroStor (Site ID: 60000967), the facility operated as a dry-cleaner since the approximately 1984. The Site had a dry cleaning machine that historically used PCE for dry-cleaning operations. The facility entered into a voluntary cleanup agreement with the DTSC in September 2008 to investigate and remediate PCE releases to soil, soil vapor, and groundwater. Soil vapor extraction (SVE) was reportedly employed at the facility from December 2000 through August 2001; from March through August 2006; from October 2007 through March 2008. At the request of DTSC, soil, soil gas, and groundwater investigations were conducted between 2009 and 2012. As of 2012, PCE containing machinery had reportedly been removed from the Site and in August 2013 DTSC issued a letter of No Further Action (NFA) Determination to Snow White Cleaners.

OEF 2 - Paragon Cleaners (1310 Vine Street). The Paragon Cleaners facility is located at 1310 Vine Street, approximately 510 feet north of the Site. According to GeoTracker (Global ID: SL0603766574), the facility operated as a dry-cleaner since the early 1960s. From the beginning of its operations, the dry cleaners housed two pieces of equipment that used PCE. In 2006, dry-cleaning equipment that used PCE was replaced with equipment that used green chemicals. Environmental investigations and remediation of soil, soil vapor, and groundwater is being conducted with the oversight of the LA-RWQCB. The results of sampling indicate that PCE has been released and is migrating in groundwater to the southwest (away from the Site). According to the Second Quarter 2020 Groundwater Monitoring Report, prepared by Murex Environmental, Inc (Murex), dated July 8, 2020, an in-situ chemical reduction (ISCR) and enhanced reductive dichlorination (ERD) treatment was implemented to prevent VOC migration from the facility. PCE concentrations drastically decreased in the existing groundwater monitoring wells located on the facility property and southwest of the facility. Murex recommended continued groundwater monitoring with the ISCR barrier treatment.

1. Introduction

Roux Associates, Inc. (Roux) completed this Phase I Environmental Site Assessment (ESA) of the commercial property located at 1212 and 1218 Vine Street, Los Angeles, California (the Site). The Site location is shown in Figure 1 and the Site and vicinity is shown in Figure 2. Roux performed this Phase I ESA in compliance with the scope and limitations of American Society for Testing Materials (ASTM) E1527-13 and the terms and conditions of Roux' proposal dated June 11, 2020. Roux conducted this Phase I ESA for the benefit of MIG Real Estate (the User).

The following sections of this report present our Phase I ESA findings and conclusions. A glossary containing terms and definitions presented in ASTM E1527-13 is included in Appendix A – Glossary of Terms. Other appendices presented at the end of the report include historical topographic maps, historical aerial photographs, regulatory records review documentation, applicable historical records, and personnel qualifications.

1.1 Purpose

The purpose of this Phase I ESA is to identify and report, to the extent feasible, recognized environmental conditions (RECs) with respect to the Site. Performing a Phase I ESA in general compliance with ASTM E 1527-13 may enable a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. That is, the practice that constitutes one of the requirements for "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC Section 9601(35) (B).

1.2 Scope of Services

The scope of services for this Phase I ESA included, but was not limited to, the activities listed below.

- A review of reasonably ascertainable and practicably reviewable topographic maps, historical aerial photographs, and city directories, if available, to investigate past Site conditions;
- A review of specific government lists pursuant to ASTM Standard E 1527-13 regarding environmental activities for the Site and local area properties;
- A review of recorded land title records, building, assessors, and fire department records, for permits, citations, and reports connected to the Site that were reasonably ascertainable, practicably reviewable, and publicly available within reasonable time and cost;
- An inspection by an environmental professional to investigate the current use of the Site and to identify environmental concerns including but not limited to, the presence of hazardous substances or petroleum products, wastes, underground storage tanks (USTs), aboveground storage tanks (ASTs), or other environmental concerns;
- Interviews with available representatives of the owner of the Site, occupants, and local government officials by an environmental professional; and
- Preparation of this Phase I ESA report.

Roux initiated this Phase I ESA pursuant to receipt of written authorization to proceed on August 24, 2020.

1.3 Standard of Care

Roux conducted this Phase I ESA using a defined scope of services considered appropriate and agreed upon by all parties on the date the service was authorized, unless the scope of services or the methods used were later modified, in writing, and accepted by all parties prior to performance. Roux conducted this Phase I ESA in accordance with generally accepted practices in a manner consistent with that level of care exercised by other members of our profession in the same locality and under similar conditions of time and accessibility of improvements and information. No other representations, expressed or implied, and no warranty or guarantee is included or intended to be part of this Phase I ESA.

Please note that the scope of services performed in execution of this assessment may not be appropriate to satisfy the needs of other parties. We, therefore, are not responsible for independent conclusions, opinions, or recommendations of others based on our assessment. Furthermore, this Phase I ESA relates to the environmental conditions of the Site and does not address issues raised in transactions such as business risk, purchase of business entities, or interests therein, or of their assets, that may well involve environmental liabilities pertaining to properties previously owned or operated or other offsite liabilities.

Additionally, the findings of this Phase I ESA are based on Roux' observations, inquiries, and historical research using reasonably ascertainable and practically reviewable information obtained within reasonable time and cost constraints. Roux does not represent that this Phase I ESA is an exhaustive investigation that reflects the findings of all of the information available for the Site, nor is it representative of future Site conditions. If additional information is generated from the Site, it should be provided to Roux so that we may evaluate its impact on our conclusions. As such, activities or episodes that transpire subsequent to this Phase I ESA are not considered in this assessment. It is not intended that a Phase I ESA in accordance with ASTM E1527-13 be an exhaustive assessment of a property nor can it wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a property.

1.4 Assumptions

This Phase I ESA Report, including the exhibits attached hereto, describes the results of Roux' investigation to identify the presence of *recognized environmental conditions* connected with the Site in accordance with ASTM E1527-13, as allowed by and consistent with the regulatory requirements of the All Appropriate Inquiry Rule, 40 CFR Part 312, Amendment to Standards and Practices for All Appropriate Inquires Under CERCLA, Final Rule, published December 30, 2013 (AAI Rule). Specifically, the preamble to the amended AAI Rule states:

> *The Environmental Protection Agency (EPA) today is taking final action to amend the standards and practices for conducting all appropriate inquiries under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) to reference a standard practice recently made available by ASTM International, a widely recognized standards development organization. Specifically, this final rule amends the ''All Appropriate Inquiries Rule'' at 40 CFR Part 312 to reference ASTM International's E1527–13 ''Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process'' and make clear that persons conducting all appropriate inquiries may use the procedures included in this standard to comply with the All Appropriate Inquiries Rule*[1].

One of the requirements that a person acquiring real property must meet in order to qualify for either the innocent landowner, contiguous owner, or bona fide prospective purchaser (collectively hereinafter

[1] Federal Register: December 30, 2013 (Volume 78, Number 250) Page 79319

"Prospective Purchaser") defense to liability under the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986, and the Small Business Liability Relief and Brownfields' Revitalization Act of 2002, 42 U.S.C. 9601-9675 (collectively referred to hereafter as "CERCLA") is that person must conduct all appropriate inquiries into the previous ownership and uses of the property in conformance with the AAI Rule (or the ASTM E1527-13) prior to acquisition of the property. The User has acknowledged that, under the AAI Rule, Roux' performance of this Phase I ESA in accordance with ASTM E1527-13 will not alone result in the User satisfying all requirements of the AAI Rule and will not in itself provide a defense to CERCLA liability. The User has acknowledged that the AAI Rule also requires that the Prospective Purchaser undertake certain additional inquiries and post-acquisition activities to satisfy the CERCLA AAI requirements. Accordingly, Roux makes no guarantees or warranties, expressed or implied, regarding this Phase I ESA, including without limitation, that this Phase I ESA will qualify the User for a defense to CERCLA liability.

Roux has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux.

The AAI Rule requires, and the conclusions and recommendations stated herein represent, the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Site. As such, these conclusions and recommendations are based on subjective interpretations and the exercise of discretion based on the facts available to Roux and conditions at the time of the performance of this Phase I ESA. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions and recommendations must be considered within this context.

The User has agreed that Roux shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time this Phase I ESA was performed. To the extent practicable, Roux has identified data gaps, and has evaluated the potential significance of such data gaps. Recommendations to address those data gaps are presented herein and are based on the data available at the time of the performance of this Phase I ESA. Implementation of the recommendations may not fully address the data gaps, and the information obtained from execution of those recommendations may alter and/or modify the interpretation of the Site conditions and conclusions, herein. This Phase I ESA does not include consideration of matters specifically excluded by ASTM E1527-13, including but not limited to, asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, and mold unless specifically identified herein.

Roux has not collected any soil and/or groundwater samples on the Site for Phase I purposes, and is relying on information presented by others, often in preliminary, draft, or verbal form. By referencing this information, Roux does not accept responsibility for the accuracy of the underlying data, sampling methods, laboratory analysis, or documentation.

This Phase I ESA Report should not be considered a legal interpretation of existing environmental laws and regulations. This Phase I ESA was conducted with a reasonable degree of inquiry to identify *recognized environmental conditions*, but uncertainty is not eliminated. No Phase I ESA can wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a property. The Phase I ESA process is intended to reduce, but not eliminate, the uncertainty involved with identifying *recognized environmental conditions*.

This Phase I ESA Report is not an appraisal or value judgment of the Site. The User has agreed that Roux shall not be liable for any use of this Phase I ESA Report as an appraisal or value judgment of the Site.

This Phase I ESA Report has been prepared for the exclusive use of the User for specific application to the Site covered by this Phase I ESA Report. The User has agreed that any third-party use of this Phase I ESA Report, upon disclosure by the User, is the sole responsibility and at the sole liability of the User.

1.5 User Reliance

This report has been prepared for the exclusive use of the User. No additional parties may use the information contained in this report without obtaining the written permission of Roux and the User. Roux' duties and obligations extend to the User and to no other party. Roux' duties and obligations to the User are not transferable to persons, corporations, or organizations without the express written consent of the User and Roux. The User may rely upon the information provided in this Phase I ESA report for a period of 180 days from the date of issue. After 180 days, this Phase I ESA should be updated in accordance with ASTM guidance. Roux will not be liable for any consequential damages arising from the use of this report for other than its intended purpose, for use of this report beyond 180 days of its issue date, or from unauthorized use by third parties.

This Phase I ESA report must be read and interpreted as a whole and can only be considered representative of the conditions of the Site as of the date of our site reconnaissance described herein. Roux makes no representation whatsoever concerning the condition of the Site beyond the date of our site reconnaissance described herein. Individual sections and appendices of this report are dependent on the balance of this report, and on the terms, conditions, and stipulations contained in the proposal and written amendments accepted by Roux.

2. Site Description

2.1 Site Location and Description

Site Information	
Site Name	1200 Vine
Street Address(es)	1212 and 1218 Vine Street
City	City of Los Angeles
County	Los Angeles County
State	California
Location	Northeast of the intersection between Lexington Avenue and Vine Street
Assessor's Parcel Number (APN)	5534-002-023 (1212 Vine Street; "Parcel 1") 5534-002-018 (1218 Vine Street; "Parcel 2")
Site Acreage	0.62 acres
Site Occupant(s)	Goodwill Store & Donation Center Dollar Tree
Onsite Operations	Commercial and retail space
Description of Onsite Structures	Two single-story buildings and designated asphalt-paved customer parking areas
Site Paving	Buildings sit on concrete slab Entire parking area is asphalt-paved
Site Grading	Graded to drain at a gentle slope roughly oriented east to west
Site Vicinity	Mixed commercial and residential

Refer to Section 5.0 for a detailed description of the current condition of the Site and operations.

2.2 Vicinity General Characteristics

The facilities and improvements which are located immediately adjacent to the Site are provided in the following table.

Direction from Site	Improvements / Use (Addresses)
North	Commercial office building occupied by Los Angeles County, Hollywood Mental Health Center (1234 Vine Street); followed by La Mirada Avenue and a commercial strip center
Northwest	Vine Street; followed by Taglyan Cultural Complex (1219 Vine Street); Stage Jewelry & Loan Co. Pawn Shop (1223 Vine Street); and La Mirada Avenue.
East	Residential structures, followed by North El Centro Avenue
Southeast	Lexington Avenue, followed by residential structures
South	Lexington Avenue, followed by Taco Bell (6254 Lexington Avenue)

Direction from Site	Improvements / Use (Addresses)
Southwest	Intersection of Lexington Avenue and Vine Street, followed by commercial businesses: Youth Policy Institute (1147 Vine Street) and Beautycon (1161 Vine Street)

2.3 Past Use of the Site

Based on Roux's review of historical sources, the Site was undeveloped and vacant until 1919. By 1919, the Site was developed with several structures. Based on several EDR City Directory listings, the Site has been used as an automobile mechanic shop, car washing facility, and for media production. By 1981, both present-day buildings were developed. According to Mr. Howard Entin, Managing Partner of 1200 Vine Street Property, LP, owners of the Site, Amatron Electronics, a retail/wholesale electronics store, occupied the entirety of the Site from prior to 1996 through 2000. The Site has been occupied by Goodwill from 2000 to present. Dollar Tree has been a Site tenant since 2014. Since at least 1996 the Site has been exclusively used for commercial retail purposes.

2.4 Physical Setting

Roux obtained and reviewed published, reasonably ascertainable information concerning the physical setting of the Site. The following is a summary of the information reviewed from those physical setting sources.

Physical Setting Summary	
United States Geological Survey (USGS) Topographic Map	Hollywood, California Quadrangle
Approximate Site Elevation / Source	Approximately 313 feet above mean sea level (msl) / Hollywood, California (2012) 7.5-minute quadrangle topographic map published by the USGS
Nearest Surface Water Features / Approximate Distance	Hollywood Reservoir / 1.75 miles north-northwest of the Site
Regional Geology / Source	Subsurface soils consist primarily of interbedded fine-grained cohesive soils (silts and clays) with isolated lenses of sand to approximately 80 feet below ground surface. The soils exhibit the characteristics typical of alluvial fan deposits within the Bellflower Aquiclude, which are dominated by fine-grained sediments within which higher-permeability sand lenses have been deposited during times of high rainfall/high surface flow (Murex 2020).
Site Topography / Source	Generally flat with a gradual slope to the south / Site observation and USGS topographic map
Hydrogeological Region / Source	The Site is situated over the Hollywood Subbasin of the Central Groundwater Basin of the Los Angeles-San Gabriel Hydrologic Unit. The alluvium within the Site vicinity consists of recent alluvium, underlain by the Pleistocene deposits of the Lakewood Formation. Within the Lakewood deposits lie the Bellflower Aquiclude, and the Exposition and Gage Aquifers (DWR, 1961). According to the RWQCB, groundwater within the basin has existing beneficial use for municipal, industrial, and agricultural purposes.

Physical Setting Summary	
Depth to Groundwater / Source	Groundwater is typically encountered at depths between 20 and 37 ft-bgs near the Site, shallowing towards the south/southwest (Murex 2020).
Groundwater Gradient Direction / Source	South/southwest with an average gradient of 0.008 feet per foot (ft/ft) within the A-Zone
Onsite Soil	Interbedded fine-grained cohesive soils (silts and clays) with isolated lenses of sand to approximately 80 feet below ground surface (Murex 2020).

3. Sources of Information

Sources of information utilized in preparing this Phase I ESA report included historical topographic maps; historical aerial photographs; a walkover survey of the Site and adjoining properties; in-person discussions with User and tenant personnel; a review of records available at selected local and state regulatory agencies; a review of databases maintained by local, state, and federal government agencies; and other records available from commercial and online sources.

3.1 Historical Sources

To help understand the history of the Site and past land uses, historical sources were obtained from Environmental Data Resources, Inc. (EDR), of Shelton, Connecticut. The sources and locations within the Appendices are provided in the table below.

EDR Historical Sources		
Historical Range	**Source**	**Appendix**
1894 - 2012	U.S. Geological Survey Topographic Maps	B
1928 - 2016	EDR Aerial Photographs "Decade Package"	C
1919 – 1970	EDR "Certified Sanborn® Map Report"	D
1920 - 2014	EDR "City Directory Image Report"	E

3.2 Government Databases

To document potential sources of contamination at or near the Site, a government records search was conducted by EDR. The search included local, state, and federal records for the Site and for other properties within ASTM-standard distances of the Site. The records search is summarized in Section 8.0 and a copy of "The EDR Radius Map™ Report with GeoCheck®," dated August 27, 2020, is included in its entirety as Appendix F. As recommended by ASTM, all but a few of the databases searched were "current," i.e., had been updated within 90 days prior to the search date.

3.3 Site Reconnaissance

On October 22, 2020, Roux personnel conducted a Site Reconnaissance, including the interiors of all buildings. During the Site Reconnaissance, Roux was escorted by Mr. Timothy L. Bower, Senior Vice President for CBRE, Commercial Real Estate Services, and broker representing the owner of the Site. Mr. Bower provided limited information regarding Site operations, which is referenced, as appropriate, throughout the remainder of this Phase I ESA report. Roux was allowed full access of both retail stores (Dollar Tree and Goodwill) and with tenant consent collected photographs during the Site Reconnaissance (Appendix G).

3.4 Regulatory Agencies

Roux contacted governmental agencies for reasonably ascertainable information concerning environmental conditions at the Site. Roux contacted or reviewed information from the agencies provided in the following table. Refer to Appendix H for copies of the records received and reviewed. A summary of the information

gathered from the regulatory agencies is provided in the table and details regarding the records were incorporated into applicable sections as noted.

Agency	Date Requested / Accessed	Response Date	Description of Records	Section Discussed
Federal				
U.S. Environmental Protection Agency (EPA) – FOIAonline	08/26/2020	-09/02/2020	A response stated that public records can be accessed via the MyProperty portal. See the section below.	N/A
U.S EPA MyProperty Database	08/26/2020	N/A	No records were associated with the Site.	N/A
National Pipeline Mapping System (NPMS) Online Database	08/26/2020	N/A	The nearest hazardous liquid pipeline is located approximately 3.2 mile south-southeast of the Site. The nearest gas transmission pipeline is located approximately 5 miles southeast of the Site.	N/A
State				
State Water Resources Control Board (SWRCB): GeoTracker Online Database	08/26/2020	N/A	No records were associated with the Site. Six listings were identified within 1,000 feet of the Site. Three of which are closed LUST cases. The remaining three cases are associated with the Paragon Cleaners facility (see Section 8.1.2).	8.1.2
SWRCB: Storm Water Multiple Application and Report Tracking System (SMARTS) Online Database	08/26/2020	N/A	No records were associated with the Site.	N/A
Department of Toxic Substances Control (DTSC)	08/26/2020	09/17/2020	Records associated with the Site indicate that electronic devices were collected and handled under the Goodwill Southern California entity from 2013 through 2019.	N/A
DTSC: EnviroStor Online Database	08/26/2020	N/A	No records were associated with the Site. Three listings were identified within 1,000 feet of the Site. Two of which are inactive cases. The third case is associated with the Snow White Cleaners facility. The facility received a No Further Action status in August 2013.	N/A
DTSC: Hazardous Waste Tracking System (HWTS) Online Database	08/26/2020	N/A	No records were associated with the Site.	N/A

Agency	Date Requested / Accessed	Response Date	Description of Records	Section Discussed

Los Angeles County Sanitation District (LACSD)	08/26/2020	08/27/202	No records were associated with the Site.	N/A
City / Local				

Agency	Date Requested / Accessed	Response Date	Description of Records	Section Discussed
City of Los Angeles Sanitation Bureau	08/26/2020	09/01/2020	Records associated with the Site included four canceled applications for industrial waste permits, dated September 1963 through August 1972, under the entity name: Rancho Car Wash. No citations have been issued for the last five years.	N/A
City of Los Angeles Department of Building and Safety	08/26/2020	N/A	Records associated with the Site included certificates of occupancy and applications for building permits, electrical and HVAC plan check and inspection, and installation and inspections of signs.	N/A
City of Los Angeles Fire Department	08/26/2020	09/08/2020	Records associated with the Site indicate no violations as of February 7, 2018.	N/A
City of Los Angeles Public Works: Bureau of Engineering	08/26/2020	09/02/2020	Records associated with the Site included a utility permit for a soil boring located on Lexington Avenue, which borders the Site to the south.	N/A

3.5 User Provided Information

ASTM E1527-13 provides that the User perform certain tasks. The purpose of this section is to present select User-provided information that can assist in identifying possible *recognized environmental conditions* in connection with the Site. According to ASTM E1527-13, these tasks do not require the technical expertise of an environmental professional and the environmental professional generally does not perform these tasks. Roux administered a questionnaire to the User at the beginning of this Phase I ESA to assist them with these tasks. The following sections outline the parts of the questionnaire that the User completed.

3.5.1 Environmental Liens or Activity and Use Limitations

The User indicated that they have no knowledge regarding environmental liens or activity and use limitations (engineering/institutional controls) with respect to the Site.

3.5.2 Specialized Knowledge

The User did not report any specialized knowledge related to the Site.

3.5.3 Valuation Reduction for Environmental Issues

The User indicated that they have no knowledge regarding valuation reduction for environmental issues.

3.5.4 Commonly Known or Reasonably Ascertainable Information

The User did not have any knowledge regarding commonly known or reasonable ascertainable information about the Site not otherwise addressed.

3.5.5 Obvious Indicators of the Presence or Likely Presence of Contamination of the Site

The User did not have any knowledge regarding obvious indicators of the presence or likely presence of contamination of the Site not otherwise addressed.

4. Site History

This section documents the history of the Site and describes current conditions and existing or former environmental features.

4.1 Site History

The history of the Site and, to a lesser extent, the surrounding area, including previous land use, has been compiled based on information from the exhaustive list of sources provided in Section 3.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
Predevelopment History				
Pre-1990s	1894	Historical Topographic Map: Los Angeles (15-minute)	The 1894 Historical Topographic Map suggests that the Site was undeveloped.	The 1894 Historical Topographic Map suggests that the vicinity was developed with a network of surface streets, including the present-day Santa Monica Boulevard that borders the Site to the south and the present-day North Gower Street that borders the Site to the east. The map depicts a railroad identified as "Hollywood and Cahuenga Valley" that appears to run along the present-day Hollywood Boulevard and Western Avenue.
	1896	Historical Topographic Map: Santa Monica (15-minute)	The 1896 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1896 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1898	Historical Topographic Map: Santa Monica (15-minute)	The 1898 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1898 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
1900s	1900	Historical Topographic Map: Los Angeles (15-minute)	The 1900 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1900 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1902	Historical Topographic Map: Santa Monica (15-minute)	The 1902 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1902 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
Initial Site Development – Automobile Warehouse				
1910s	1919	Certified Sanborn Map	The 1919 Certified Sanborn Map depicts two dwellings and three structures labeled as "AUTO HO," which is an abbreviation for automobile warehouse, at the Site.	The 1919 Certified Sanborn Map shows ten dwellings to the east of the Site along Betty's Court. There are several dwellings scattered in the vicinity.
1920s	1920	Historical Topographic Map: Santa Monica (15-minute)	The 1920 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1920 Historical Topographic Map shows increased urban developments, including residential dwellings and surface streets that closely resemble present-day configuration, in the vicinity. The "Hollywood and Cahuenga Valley" railroad is no longer shown. The map depicts an oil well field, later identified as "Brea Oil Field," approximately 1 mile southwest of the Site.
	1921	Historical Topographic Map: Santa Monica (15-minute)	The 1921 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1921 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1924	Historical Topographic Map: Hollywood (7.5-minute)	The 1924 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1924 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
		Los Angeles Directory. Co. City Directory	The 1924 Los Angeles Directory Co. City Directory identified a business entity named, "WILLIANS H D auto mech r," under the Site addresses: 1216 and 1218 Vine Street, and 6245 Lexington Avenue.	N/A
	1926, 1928	1926 Historical Topographic Map: Hollywood (7.5-minute) 1926 Historical Topographic Map: Burbank (7.5-minute) 1928 Historical Topographic Map: Glendale (7.5-minute)	The 1926, 1928 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1926, 1928 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
		1928 Historical Topographic Map: Los Angeles, (7.5-minute)		
	1928	EDR Aerial Photograph	The 1928 EDR Aerial Photograph suggests that the Site is unpaved. There appears to be some vegetation. However, based on the City Directory and Certified Sanborn Maps, it is evident that there have been developments at the Site by this time.	Consistent with prior historical topographic maps, the 1928 EDR Aerial Photograph shows residential dwellings in the vicinity.
	1929	Los Angeles Directory Co. City Directory	The 1929 Los Angeles Directory Co. City Directory identifies a business entity named "Esse Clarence B Esta B garage Westby Elmer auto mech r" at the Site address: 6245 Lexington Avenue.	N/A
1930s	1933	Los Angeles Directory Co. City Directory	The 1933 Los Angeles Directory Co. City Directory identifies a business entity named "Markowitz Saml Edith garage" at the Site address: 6245 Lexington Avenue.	N/A
Second Site Development – Automobile and Movie Warehouses				
1930s	1938	EDR Aerial Photograph	The 1938 EDR Aerial Photograph depicts the development of the present-day southeastern building at the Site. The northern portion of the Site appears to be paved and vacant, and the southwestern portion of the Site appears to remain undeveloped with some vegetation.	The 1938 EDR Aerial Photograph shows the development of the present-day streets: Wilcox Avenue, Cole Avenue, and Cahuenga Boulevard, located west of the Site.
1940s	1942	Los Angeles Directory Co. City Directory	The 1942 Los Angeles Directory Co. City Directory identifies a business entity named "GENERAL Communication Products Co Louis Robinson exec v pres sound equip" at the Site Address: 6245 Lexington Avenue. The 1942 Los Angeles Directory Co. City Directory also identified another business entity named "MATTHEWS Helen beauty opr" at the Site addresses: 1216 and 1218 Vine Street, and 6245 Lexington Avenue.	N/A
	1948	Historical Topographic Map: Burbank (7.5-minute)	The 1948 Historical Topographic Map only shows the northern portion of the sheet; therefore, the Site is unmapped.	The 1948 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
		EDR Aerial Photograph	The 1948 EDR Aerial Photograph shows that the southwestern portion of the Site appears to be developed as a parking lot area. The southeastern building remains present, and the northern portion remains paved and vacant.	The 1948 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
1950s	1950	Certified Sanborn Map	The 1950 Certified Sanborn Map depicts several operations, such as two areas labeled as "AUTO SALES" in the southwestern portion, one dwelling with a parking lot area in the northern portion, and an area labeled as "MOVIE PROP W. HO," which is an abbreviation for movie warehouse, in the southeastern portion.	The 1950 Certified Sanborn Map shows increased urban development in the vicinity, including the Hollywood-Vine Methodist Church to the west, a movie theater to the north, and dwellings to the east and south.
	1951	Pacific Telephone & Telegraph Co. City Directory	The 1951 Pacific Telephone & Telegraph Co. City Directory identifies a business entity named "Lexngtn Av Vibradamp Corp vibration engnmg" at the Site address: 6245 Lexington Avenue.	N/A
	1952	EDR Aerial Photograph	The 1952 EDR Aerial Photograph shows an access road, dividing the southwestern portion and the southeastern portion of the Site, from the present-day Lexington Avenue to the northern portion of the Site.	The 1952 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
	1953	Historical Topographic Map: Hollywood (7.5-minute)	The 1953 Historical Topographic Map is shaded red, which indicates densely built-up area.	The 1953 Historical Topographic Map no longer shows the Brea Oil Field to the southwest. It appears to be redeveloped with surface streets. The northwest-southwest trending 101 Freeway is depicted northeast of the Site.
	1954	EDR Aerial Photograph	The 1954 EDR Aerial Photograph does not appear to reflect any significant changes at the Site.	The 1954 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
	1955	Certified Sanborn Map	The 1955 Certified Sanborn Map shows that the previously labeled "MOVIE PROP W. HO" southeastern portion was redeveloped to a "PLASTIC PRODUCT ASSEMBLE" operation. The remaining portions of the Site remain unchanged.	The 1955 Certified Sanborn Map does not appear to reflect any significant changes to the vicinity.
	1957	Certified Sanborn Map	The 1957 Certified Sanborn Map shows the previously labeled parking	The 1957 Certified Sanborn Map does not appear to

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
			area in the northern portion was redeveloped to an "AUTO LAUNDRY" operation with a "POLISHING" unit. The remaining portions of the Site remain unchanged.	reflect any significant changes to the vicinity.
	1958	Pacific Telephone City Directory	The 1958 Pacific Telephone City Directory identifies a business entity named "Rancho Car Wash" at the Site address: 1218 Vine Street. According to records from the City of Los Angeles Sanitation Bureau, Rancho Car Wash applied for industrial waste permits from September 1963 through August 1972. These permit applications were all canceled for unknown reasons.	N/A
1960s	1960	Certified Sanborn Map	The 1960 Certified Sanborn Map shows the previously labeled "PLASTIC PRODUCT ASSEMBLE" in the southeastern portion was now vacant. The remaining portions of the Site remain unchanged.	The 1960 Certified Sanborn Map does not appear to reflect any significant changes to the vicinity.
	1961	Certified Sanborn Map	The 1961 Certified Sanborn Map shows the previously vacant southeastern portion was redeveloped to a "PRIV GARAGE" operation. The remaining portions of the Site remain unchanged. According to a certificate of occupancy issued by the City of Los Angeles Department of Building and Safety in October 1961, a motor-vehicle storage garage occupied the Site at 6245 Lexington Avenue.	The 1961 Certified Sanborn Map does not appear to reflect any significant changes to the vicinity.
	1964	EDR Aerial Photograph	The 1964 EDR Aerial Photograph does not appear to reflect any significant changes at the Site.	The 1964 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
	1966	Historical Topographic Map: Hollywood (7.5-minute)	The 1966 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1966 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1968	Certified Sanborn Map	The 1961 Certified Sanborn Map shows the previously labeled "PRIV GARAGE" southeastern portion was redeveloped to a "AUTO SERVICE" operation. The remaining portions of the Site remain unchanged.	The 1961 Certified Sanborn Map does not appear to reflect any significant changes to the vicinity.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
1970s	1971	Pacific Telephone City Directory	The 1971 Pacific Telephone City Directory identifies a business entity named “Rancho Car Wash” at the Site address: 1218 Vine Street.	N/A
	1972	Historical Topographic Map: Hollywood (7.5-minute)	The 1972 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1972 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1976	Pacific Telephone City Directory	The 1976 Pacific Telephone City Directory identifies a business entity named “Rancho Car Wash” at the Site address: 1218 Vine Street. The 1976 Pacific Telephone City Directory also identifies another business entity named “American Electronic Supply Inc” at the Site address: 1200 Vine Street. According to a certificate of occupancy issued by the City of Los Angeles Department of Building and Safety in September 1976, a one-story photo finishing and film sales building occupied the Site at 1204 Vine Street.	N/A
	1977	EDR Aerial Photograph	The 1977 EDR Aerial Photograph suggests that the northern portion of the Site has been asphalt-paved and utilized as a parking lot area. The southeastern building and the southwestern parking lot remains on-Site. According to a certificate of occupancy issued by the City of Los Angeles Department of Building and Safety in June 1980, a one-story retail store with parking spaces occupied the Site at 1200 Vine Street.	The 1977 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.
	1979	EDR Aerial Photograph	The 1979 EDR Aerial Photograph does not appear to reflect any significant changes at the Site.	The 1979 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
1980s	1981	EDR Aerial Photograph	The 1981 EDR Aerial Photograph shows the construction of the present-day northern building. The southeastern building and southwestern parking lot area remain present.	The 1981 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.

Summary of Historical Sources				
Decade	**Year**	**Source**	**Site Description**	**Vicinity Description**
		Historical Topographic Map: Hollywood (7.5-minute)	The 1981 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1981 Historical Topographic Map does not appear to reflect any significant changes to the vicinity, with the exception of some revised structures.
	1989	EDR Aerial Photograph	The 1989 EDR Aerial Photograph does not appear to reflect any significant changes at the Site.	The 1989 EDR Aerial Photograph does not appear to reflect any significant changes to the vicinity.
1990s	1991	Historical Topographic Map: Hollywood (7.5-minute)	The 1991 Historical Topographic Map does not appear to reflect any significant changes at the Site.	The 1991 Historical Topographic Map does not appear to reflect any significant changes to the vicinity.

5. Site Reconnaissance

A Roux' representative conducted a reconnaissance of the Site and surrounding areas on October 22, 2020. During the Site visit, Roux representative Mr. Mauricio H. Escobar met with Mr. Bower, broker for the current Site owner. Roux visually and/or physically observed adjoining properties from reasonably accessible locations on the Site and public thoroughfares. During the site reconnaissance, the weather was clear and the temperature was approximately 75° Fahrenheit. The following sections summarize observations during the inspection.

5.1 Current Site Condition and Limitations

The Site is occupied by two commercial retail stores, Dollar Tree along the eastern Site boundary and Goodwill along the northern Site boundary. Both stores feature large open retail space with shelves and racks for display and shopping of merchandise. Exposed flooring in the Dollar Tree space is polished concrete slab and various types of tile inside Goodwill. Both stores have bathrooms and separate storage/delivery areas. Dollar Tree has a hydraulic box crusher, wash/mop area, walk in freezer, as well as electrical panel/transformer in its storage space along the southern wall. Dollar Tree also has a commercial refrigerator for its retail customers to purchase cold drinks and perishable items. Finally, Goodwill has an electrical panel/transformer within a designated room near the southeastern corner of the store.

The remainder of the Site provides surface parking to customers. Asphalt was observed to be in fair shape with some areas of disrepair and patches. The Site is accessible from Vine Street to the west by two ingress/egress driveways. The Site is surrounded by block walls and steel fencing along it's southern and western boundaries.

5.2 Phase I ESA Observations

During Site reconnaissance, Roux personnel attempt to identify any environmental features that may be relevant in the context of the Phase I ESA. The features identified are summarized in the table below. Any such features are discussed in the following subsections.

Feature	Observed on the Site	Observed on an Adjacent Property
Areas of stressed vegetation		
Areas which receive flood or storm water from potentially contaminated areas		
Air Compressor Vent Discharges		
Drainage Swales and Culverts		
Discharge Areas		
Discolored or Spill Areas		
Drums (55 Gallons or Larger)		

Feature	Observed on the Site	Observed on an Adjacent Property
Electrical Transformers	X	
Former Agricultural Applied Pesticide Area		
Hydraulic Lifts		
Incinerators		
Landfills or Landfarms		
Loading and Unloading Areas	X	
Non-Contact Cooling Water Discharge		
Oil-Water Separator(s)		
Open Areas Away from Production Areas		
Process Area Sinks and Piping		
Rail Cars/Railroad Spurs		
Septic Systems Leach Fields or Seepage Pits		
Silos		
Sprayfields		
Storm Sewer and Spill Containment Collection System		
Storm Water Detention Pond		
Surface Impoundments and Lagoons		
Underground / Aboveground Storage Tanks and Associated Piping		
Vapor Intrusion		
Waste Piles		

5.2.1 Underground / Aboveground Storage Tanks and Associated Piping

No underground or aboveground storage tanks and associated piping were identified in connection with the Site.

5.2.2 Oil-Water Separator

No oil-water separator was identified in connection with the Site.

5.2.3 Vapor Intrusion

Roux performed a vapor migration/intrusion pathway assessment. No potential vapor migration/intrusion pathways were identified in connection with the Site or nearby off-Site sources.

6. Adjoining And Nearby Properties

The facilities and improvements which are located adjacent and in close proximity to the Site are provided in the following table. Selected adjoining and nearby properties are shown in Figure 2. Adjoining and nearby properties with potential environmental concerns are described in subsections below, as needed.

Direction from Site	Improvements / Use (Addresses)	Environmental Concerns Identified
North	Commercial office building occupied by Los Angeles County, Hollywood Mental Health Center (1234 Vine Street); followed by La Mirada Avenue and a commercial strip center	Snow White Cleaners (1246 Vine Street) and Paragon Cleaners (1310 Vine Street) – Both OEFs.
Northwest	Vine Street; followed by Taglyan Cultural Complex (1219 Vine Street); Stage Jewelry & Loan Co. Pawn Shop (1223 Vine Street); and La Mirada Avenue.	
East	Residential structures, followed by North El Centro Avenue	
Southeast	Lexington Avenue, followed by residential structures	
South	Lexington Avenue, followed by Taco Bell (6254 Lexington Avenue)	
Southwest	Intersection of Lexington Avenue and Vine Street, followed by commercial businesses: Youth Policy Institute (1147 Vine Street) and Beautycon (1161 Vine Street)	

6.1 Adjoining Property

No uses of environmental concern were identified in the immediately adjoining properties.

6.2 Nearby Property

A dry cleaner facility (Snow White Cleaners) is located at 1246 Vine Street (320 feet to the north of Site) within a commercial retail center to the north of La Mirada Avenue. A second dry cleaner facility (Paragon Cleaners) is located at 1310 Vine Street (510 feet to the north of Site). Both dry cleaner facilities are discussed further in Section 8.1.3 below. Based on available information, Roux considers both dry cleaners to be *other environmental features* in the context of the Phase I ESA.

7. Summary of Key Previous Investigations

Roux was not provided (and is not aware of) any previous environmental investigations conducted for the Site.

8. Records Review

8.1 Standard Environmental Record Sources

According to ASTM Standard E1527-13, the purpose of reviewing regulatory records is to obtain and review records that will help identify *recognized environmental conditions* in connection with the Site. In addition, some records to be reviewed pertain not only to the Site, but also to properties within an additional "approximate minimum search distance" in order to help assess the likelihood of problems from migrating hazardous substances or petroleum products. The basis of the "approximate minimum search distance" is the Site boundary.

Roux retained EDR of Shelton, Connecticut to provide an ASTM Radius Map Report (EDR Report) for this Site. This report is a computerized search of select state and federal environmental databases that identify various properties with a record of environmental activity. Roux reviewed the report and summarized the relevant findings in the following sections. A copy of the compiled EDR Report has been included as Appendix F. The EDR report includes a detailed description of each of the databases searched, providing a summary of the type of information provided by each. A summary of Roux' review of the EDR Report listings is provided in Table 1.

The following section describes the findings of the database search. Roux used professional judgement in determining which EDR-listed sites to include in the narrative of this report. Facilities adjoining the Site were included due to their proximity to the Site and the potential for surface water discharges (e.g., storm water runoff, surface water effluent discharges) to enter the Site or through the migration of groundwater. Sites with listings indicative of a release (e.g., SHWS, LUST, RELEASE) are likewise discussed below. Nonadjacent facilities with database listings not necessarily indicative of a release (hazardous waste generator, FINDS, ECHO, NPDES, HAZNET, AST, or UST) will not be discussed unless considered potentially relevant in context of the Phase I ESA.

8.1.1 Site (Target Property)

The Site is listed in the UST, HWTS, CERS HAZ WASTE, HAZNET, HAZMAT, CERS, and RCRA NonGen/NLR listings. According to the RCRA NonGen / NLR listing, in 2015, the Site was classified as a non-generator, indicating that the Site did not generate hazardous waste. At this time, there were no violations found. The CERS HAZ WASTE listing classified the Site as a hazardous waste generator. Various hazardous waste, such as unspecified organics, unspecified solvent mixtures, alkaline solution, was generated between 2017 through 2019. The Site's database listings are not indicative of environmental releases; therefore, these listings are not considered to represent an environmental concern to the Site.

8.1.2 Adjoining and Nearby Properties

Discussions of adjoining and nearby properties of potential environmental concern as noted in Table 1 are provided below.

- **Snow White Cleaners (1246 Vine Street).** The Snow White Cleaners facility is located at 1246 Vine Street, approximately 320 feet north of the Site. According to EnviroStor (Site ID: 60000967), the facility operated as a dry-cleaner since the approximately 1984. The Site had a dry cleaning machine that historically used PCE for dry-cleaning operations. The facility entered into a voluntary cleanup agreement with the DTSC in September 2008 to investigate and remediate PCE releases to soil, soil vapor, and groundwater. Soil vapor extraction (SVE) was reportedly employed at the

facility from December 2000 through August 2001; from March through August 2006; from October 2007 through March 2008. At the request of DTSC, soil, soil gas, and groundwater investigations were conducted between 2009 and 2012. As of 2012, PCE containing machinery had reportedly been removed from the Site and in August 2013 DTSC issued a letter of No Further Action (NFA) Determination to Snow White Cleaners. Based on the distance from the Site, the direction of groundwater flow (away from the Site) and NFA Determination provided by DTSC, the Snow White Cleaners facility is considered an OEF in the context of this Phase I ESA.

- **Paragon Cleaners (1310 Vine Street).** The Paragon Cleaners facility is located at 1310 Vine Street, approximately 510 feet north of the Site. The facility is listed on the EDR HIST CLEANER, CPS-SLIC, WDR, CIWQS, DRYCLEANERS, CERS HAZ WASTE, EMI, HAZMAT, CERS, HWTS, RCRA-SQG, FINDS, ECHO, HAZNET, and BROWNFIELDS databases.

  According to the CIWQS listing, there were four violations within the last five years; no other information is provided. As stated in the Facility Registry Service (FRS) facility detail report, the Site is associated with the superfund regulatory program. The EDR HIST CLEANER, WDR, DRYCLEANERS, CERS HAZ WASTE, EMI, HAZMAT, CERS, HWTS, RCRA-SQG, ECHO, HAZNET, and CERs listings are not indicative of environmental releases.

  According to GeoTracker (Global ID: SL0603766574), the facility operated as a dry-cleaner since the early 1960s. From the beginning of its operations, the dry cleaners housed two pieces of equipment that used PCE. In 2006, dry-cleaning equipment that used PCE was replaced with equipment that used green chemicals. Environmental investigations and remediation of soil, soil vapor, and groundwater is being conducted with the oversight of the LA-RWQCB. The results of sampling indicate that PCE has been released and is migrating in groundwater to the southwest (away from the Site). According to the Second Quarter 2020 Groundwater Monitoring Report, prepared by Murex Environmental, Inc (Murex), dated July 8, 2020, an in-situ chemical reduction (ISCR) and enhanced reductive dichlorination (ERD) treatment was implemented to prevent VOC migration from the facility. PCE concentrations drastically decreased in the existing groundwater monitoring wells located on the facility property and southwest of the facility. Murex recommended continued groundwater monitoring with the ISCR barrier treatment. Based on the distance from the Site, the direction of groundwater flow (away from the Site) and the active regulatory status of the Site, the Paragon Cleaners facility is considered an OEF in the context of this Phase I ESA.

8.1.3 Orphan Sites

The EDR Report includes a section addressing “Orphan Sites.” Orphan sites are sites, which, due to incomplete geographic location data, incomplete address information or incorrect address information, cannot be plotted correctly. The database report identified four unmapped facility.

- **Highline Cleaners Inc Dba Highline (3268 West Cahuenga Boulevard).** The Highline Cleaners Inc Dba Highline facility is located approximately 15,000 feet north-northwest of the Site. The facility is listed on the DRYCLEANERS and HWTS databases. The facility is an active dry-cleaning and laundry operation as of May 14, 2018. These database listings are not indicative of environmental releases; therefore, the facility is not considered to represent an environmental concern to the Site.

- **Vine New Primary Cen (La Mirada Avenue/Cahuenga Boulevard/Lexington Avenue/Cole Avenue).** The Vine New Primary Cen facility is located approximately 900 feet east of the Site. The facility is listed on the CERS database, which categorized the facility as a school investigation. This database listing is not indicative of environmental releases; therefore, the facility is not considered to represent an environmental concern to the Site.

- **Hollywood Dry Cleaners (8505 Santa Monica Boulevard).** The Hollywood Dry Cleaners facility is located approximately 15,300 feet west of the Site. The facility is listed on the DRYCLEAN SOUTH

COAST database, indicating the presence of dry-cleaning equipment that uses PCE at the facility. This database listing is not indicative of environmental releases; therefore, the facility is not considered to represent an environmental concern to the Site.

- **Peter's Cleaners (8305 Santa Monica Boulevard).** The Peter's Cleaners facility is located approximately 12,700 feet west of the Site. The facility is listed on the DRYCLEAN SOUTH COAST database, indicating the presence of dry-cleaning equipment that uses petroleum and K4 solvent. This database listing is not indicative of environmental releases; therefore, the facility is not considered to represent an environmental concern to the Site.

9. Findings

Roux has performed this Phase I ESA in general compliance with the scope and limitations of ASTM Standard Practice E1527-13. Roux separated the findings of this assessment into the following four categories: *recognized environmental conditions*, *controlled recognized environmental conditions*, *historical recognized environmental conditions* and *other environmental features*.

9.1 Data Gaps

During completion of this Phase I ESA, data gaps, as defined in ASTM Standard E1527-13, were not identified:

9.2 Recognized Environmental Conditions

Roux did not identify known or suspected RECs in connection with the current and historical operations at the Site

9.3 Controlled Recognized Environmental Conditions

Roux did not identify known or suspected cRECs in connection with the current and historical operations at the Site

9.4 Historical Recognized Environmental Conditions

Roux did not identify known or suspected hRECs in connection with the current and historical operations at the Site or adjacent properties.

9.5 Other Environmental Features

OEFs are environmental conditions that do not meet the definition of a REC, cREC, or hREC, but which may warrant mention in a comprehensive Phase I ESA. Based on the subject Phase I ESA, Roux identified the following OEFs at or in the vicinity of the Site.

OEF 1 - Snow White Cleaners (1246 Vine Street). The Snow White Cleaners facility is located at 1246 Vine Street, approximately 320 feet north of the Site. According to EnviroStor (Site ID: 60000967), the facility operated as a dry-cleaner since the approximately 1984. The Site had a dry cleaning machine that historically used PCE for dry-cleaning operations. The facility entered into a voluntary cleanup agreement with the DTSC in September 2008 to investigate and remediate PCE releases to soil, soil vapor, and groundwater. SVE was reportedly employed at the facility from December 2000 through August 2001; from March through August 2006; from October 2007 through March 2008. At the request of DTSC, soil, soil gas, and groundwater investigations were conducted between 2009 and 2012. As of 2012, PCE containing machinery had reportedly been removed from the Site and in August 2013 DTSC issued a letter of NFA Determination to Snow White Cleaners.

OEF 2 - Paragon Cleaners (1310 Vine Street). The Paragon Cleaners facility is located at 1310 Vine Street, approximately 510 feet north of the Site. According to GeoTracker (Global ID: SL0603766574), the facility operated as a dry-cleaner since the early 1960s. From the beginning of its operations, the dry cleaners housed two pieces of equipment that used PCE. In 2006, dry-cleaning equipment that used PCE was replaced with equipment that used green chemicals. Environmental investigations and remediation of soil, soil vapor, and groundwater is being conducted with the oversight of the LA-RWQCB.

The results of sampling indicate that PCE has been released and is migrating in groundwater to the southwest (away from the Site). According to the Second Quarter 2020 Groundwater Monitoring Report, prepared by Murex Environmental, Inc (Murex), dated July 8, 2020, an ISCR and ERD treatment was implemented to prevent VOC migration from the facility. PCE concentrations drastically decreased in the existing groundwater monitoring wells located on the facility property and southwest of the facility. Murex recommended continued groundwater monitoring with the ISCR barrier treatment.

11. Signature of Environmental Professional

Roux performed this assessment in accordance with the generally accepted practices for environmental assessments at the time of implementation. Roux made a reasonable effort to ensure that the information presented in this report is materially complete and accurate.

Roux completed a Phase I ESA in general compliance with the scope and limitations of ASTM Practice E1527-13 of the commercial property located at 1212 and 1218 Vine Street, Los Angeles, Los Angeles County, California.

“We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312” and,

“We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

Roux performed this Phase I ESA by, or under direct supervision of, the undersigned environmental professionals.

Respectfully Submitted,

ROUX ASSOCIATES, INC.

Mauricio H. Escobar, P.G.
Principal Geologist

APPENDIX A

Glossary of Terms

GLOSSARY OF KEY TERMS

This appendix provides definitions, description of terms, and a list of acronyms for many of the words used in ASTM E 1527-13. These terms are an integral part of ASTM E 1527-13 and are critical to understanding ASTM E 1527-13 and its use.

DEFINITIONS:

Abandoned Property – *property* that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current *owner* to surrender rights to the *property*.

Activity and Use Limitations – Legal or physical restrictions or limitations on the use of, or access to, a site or facility: *(1)* to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property*, or *(2)* to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or *engineering controls*, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property*.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) – The list of sites compiled by EPA that EPA has investigated, or is currently investigating, for potential hazardous substance contamination for possible inclusion on the National Priorities List.

Construction debris – Concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to property.

Contaminated public wells – Public wells used for drinking water that have been designated by a government entity as contaminated by toxic substances (for example, chlorinated solvents), or as having water unsafe to drink without treatment.

Contiguous Property Owner Liability Protection – a person may qualify for the *contiguous property owner liability protection* if, among other requirements, such person owns real *property* that is contiguous to, and that is or may be contaminated by *hazardous substances* from other real *property* that is not owned by that person. Furthermore, such person conducted *all appropriate inquiries* at the time of acquisition of the *property* and did not know or have reason to know that the *property* was or could be contaminated by a *release* or threatened *release* from the contiguous *property*. The *all appropriate inquiries* must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the *contiguous property owner liability protection*.

Controlled Recognized Environmental Condition – a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

CORRACTS list – a list maintained by EPA of *hazardous waste* treatment, storage, or disposal facilities and other RCRA-regulated facilities (due to past interim status or storage of *hazardous waste* beyond 90 days)

that have been notified by the U.S. Environmental Protection Agency to undertake corrective action under RCRA. The *CORRACTS list* is a subset of the EPA database that manages RCRA data.

Demolition debris – Concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to property.

Drum – A container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store *hazardous substances* or *petroleum products.*

Dry wells – Underground areas where soil have been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional), and wastewater disposal (often illegal).

Dwelling – Structure of portion thereof used for residential habitation.

Engineering controls – Physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to contaminants in the soil or groundwater on the property.

Environmental lien – A charge, security, or encumbrance upon title to a *property* to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of *hazardous substances* or *petroleum products* upon a *property*, including (but not limited to) liens imposed pursuant to CERCLA 42 USC § 9607(1) and similar state or local laws.

ERNS list – EPA's emergency response notification system list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR parts 302 and 355.

Federal Register (FR) – Publication of the Untied States government published daily (except for federal holidays and weekends) containing all proposed and final regulations and some other activities of the federal government. When regulations become final, they are included in the Code of Federal Regulations (CFR), as well as published in the Federal Register.

Fire insurance maps – Maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property. These maps are often available in local libraries, historical societies, private resellers, or from the map companies who produced them. See Question 23 of the transaction screen process in Practice E 1528 and 7.3.4.2 of this practice.

Hazardous substance – A substance defined as hazardous pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Soil Waste Disposal Act (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 *et seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof, which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A)

through (F) of this paragraph; the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

Hazardous waste – Any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Cat (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 *et seq.*) has been suspended by Act of Congress). The Solid Waste Disposal Act of 1980 amended RCRA. RCRA defines hazardous waste, in 42 USC § 6903, as: "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

Institutional control – A legal or administrative restriction (e.g., deed restriction, restrictive zoning) on the use of, or access to, a site or facility to reduce or eliminate potential exposure to contaminants in the soil or groundwater on the property.

Landfill – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *solid waste disposal site* and is also known as a garbage dump, trash dump, or similar term.

Local street directories – Directories published by private (or sometimes government) sources that show ownership, occupancy, and/or use of sites by reference to street addresses. Often, local street directories are available at libraries of local governments, colleges or universities, or historical societies.

Material safety data sheet (MSDS) – Written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard, 29, CFR 1910.1200.

National Contingency Plan (NCP) – The National Oil and Hazardous Substances Pollution Contingency Plan, found at 40 CFR § 300, that is the EPA's blueprint on how hazardous substances are to be cleaned up pursuant to CERCLA.

National Priorities List (NPL) – List compiled by the EPA, pursuant to CERCLA 42 USC § 9605(a)(8)(B), of properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System. See 40 CFR Part 300.

Occupants – Those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property.*

Owner – Generally the fee owner of record for the *property*.

Petroleum exclusion – The exclusion from CERCLA liability provided in 42 USC § 9601(14), as interpreted by the courts and EPA: "The term (hazardous substance) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

Petroleum products – Those substances included within the meaning of the *petroleum exclusion* to CERCLA, 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to *Standard Definitions of Petroleum Statistics*[1]*.)*

Phase I Environmental Site Assessment – The process described in this practice.

Pits, ponds, or lagoons – Man-made or natural depressions in the ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

Property – The real property that is the subject of the *environmental site assessment* described in this practice. Real property includes buildings and other fixtures and improvement located on the property and affixed to the land.

Property tax files – The files kept for property tax purposes by the local jurisdiction where the property is located and includes records of past ownership, appraisals, maps, sketches, photos, or other information that is reasonable ascertainable and pertaining to the property.

RCRA generators – Those persons or entities that generate hazardous waste, as defined and regulated by RCRA.

RCRA generators list – List kept by the EPA of those persons or entities that generate hazardous wastes as defined and regulated by RCRA.

RCRA TSD facilities – Those facilities at which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

RCRA TSD facilities list – List kept by the EPA of those facilities at which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

Recorded land title records – Records of fee ownership, leases, land contracts, easements, liens, and other encumbrances on or of the property recorded in the place where land title records are, by law or custom, recorded for the local jurisdiction in which the *property* is located. (Often such records are kept by a municipal or county recorder or clerk.) Such records may be obtained from title companies or directly from the local government agency. Information about the title to the property that is recorded in a U.S. district court or any place other than where land title records are, by law or custom, recorded for the local jurisdiction in which the property is located, are not considered part of recorded land title records.

Records of emergency release notifications (SARA § 304) – Section 304 of EPCRA or Title III of SARA requires operators of facilities to notify their local emergency planning committee (as defined in EPCRA) and the state emergency response commission (as defined in EPCRA) of any release beyond the facility's boundary of any reportable quantity of any extremely hazardous substance. Often the local fire department is the local emergency planning committee. Records of such notifications are "Records of Emergency Release Notifications" (SARA§ 304).

Report – The written record of a transaction screen process as required by Practice E 1528 or the written report prepared by the environmental professional and constituting part of a "Phase I Environmental Site Assessment," as required by this practice.

Solid waste disposal site – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *landfill* and is also known as a garbage dump, trash dump, or similar term.

Solvent – A chemical compound that is capable of dissolving another substance and may itself be a *hazardous substance,* used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

State registered USTs – State lists of underground storage tanks required to be registered under Subtitle I, Section 9002 of RCRA.

Sump – A pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

TSD facility – Treatment, storage, or disposal facility (*see RCRA TSD facilities*).

Underground storage tank (UST) - Any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

USGS 7.5 Minute Topographic Map – The map (if any) available from or produced by the United States Geological Survey, entitled "USGS 7.5 Minute Topographic Map," and showing the property.

Wastewater – Water that (1) is or has been used in an industrial or manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as storm water flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

Zoning/land use records – Those records of the local government in which the *property* is located, indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

DEFINITIONS SPECIFIC TO ASTM E 1527-13:

Actual knowledge – The knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge that is knowledge imputed to an individual or entity.

Adjoining properties – Any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

Aerial photographs – Photographs taken from an airplane or helicopter (from a low enough altitude to allow identification of development and activities) of areas encompassing the property. Aerial photographs are often available from government agencies or private collections unique to a local area.

Appropriate inquiry – That inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 USC § 9601(35)(B), that will give a party to a *commercial real estate* transaction the *innocent landowner defense* to the CERCLA liability (42 USC § 9601(A) and (B) and § 9607(b)(3)), assuming compliance with other elements of the defense. See Appendix X1.

Approximate minimum search distance – The area for which records must be obtained and reviewed pursuant to Section 7 subject to the limitations provided in that section. This may include areas outside the *property* and shall be measured from the nearest *property* boundary. This term is used in lieu of radius to include irregularly-shaped properties.

Building department records – Those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property. Often, building department records are located in the building department of a municipality or county.

Business environmental risk – A risk which can have a material environmental or environmentally-driven financial impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of *business environmental risk* issues may necessitate that an *environmental professional* address one or more non-scope considerations, some of which are identified in Section 12.

Commercial real estate – Any real property except a dwelling or property with no more than four dwelling units exclusively for residential use (except that a dwelling or property with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes, but is not limited to, undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units; and any property with no more than four dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial real estate transaction – A transfer of title to or possession of real property or receipt of a security interest in real property, except that it does not include transfer of title to or possession of real property or the receipt of a security interest in real property with respect to an individual dwelling or building containing fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a commercial real estate transaction does include real property purchased or leased by persons or entities in the business of building or developing dwelling units.

Controlled Recognized Environmental Condition – a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

Due diligence – The process of inquiring into the environmental characteristics of a parcel of *commercial real estate* or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

Environmental audit – The investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be used to describe Practice E 1528 or this practice, although an environmental audit may include an *environmental site assessment* or, if prior audits are available, may be part of an environmental site assessment.

Environmental professional – A person processing sufficient training and experience necessary to conduct a *site reconnaissance, interviews,* and other activities in accordance with this practice, and from the information generated by such activities, having the ability to develop opinions and conclusions regarding *recognized environmental conditions* in connection with the *property* in question. An individual's status as an environmental professional may be limited to the type of assessment to be performed or to specific segments of the assessment for which the professional is responsible. The person may be an independent contractor or an employee of the *user.*

Environmental site assessment (ESA) – The process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions.* At the option of the *user*, an environmental site assessment may include more inquiry than that constituting *appropriate inquiry* or, if the user is not concerned about qualifying for the *innocent landowner defense,* less inquiry than that constituting *appropriate inquiry.* An environmental site assessment is both different from and less rigorous than an *environmental audit.*

Fill dirt – Dirt, soil, sand, or other earth, obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

Hazardous waste/contaminated sites – Sites on which a release has occurred, or is suspected to have occurred, of any *hazardous substance, hazardous waste,* or *petroleum products,* and that release or suspected release has been reported to a government entity.

Historical Recognized Environmental Condition – a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). Before calling the past *release* a *historical recognized environmental condition*, the *environmental professional* must determine whether the past *release* is a *recognized environmental condition* at the time the *Phase I Environmental Site Assessment* is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past *release* to be a *recognized environmental condition* at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a *recognized environmental condition*.

Innocent landowner defense – That defense to CERCLA liability provided in 42 USC § 9601(35) and § 9607(b)(3). One of the requirements to qualify for this defense is that the party make "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." There are additional requirements to qualify for this defense.

Interviews – Those portions of this practice that are contained in Section 9 and 10 thereof and address questions to be asked of *owners* and *occupants* of the *property* and questions to be asked of local government officials.

Key site manager – The person identified by the *owner* of a *property* as having good knowledge of the uses and physical characteristics of the property.

Local government agencies – Those agencies of municipal or county government having jurisdiction over the *property.* Municipal and county government agencies include, but are not limited to, cities, parishes, townships, and similar entities.

LUST sites – State lists of leaking underground storage tank sites. Section 9003 (h) of Subtitle I of RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up releases from UST systems or require owners and operators to do so.

Major occupants – Those tenants, subtenants, or other persons or entities each of which uses at least 40% of the leasable area of the *property* or any anchor tenant when the *property* is a shopping center.

Material threat – A physically observable or obvious threat which is reasonable likely to lead to a release that, in the opinion of the *environmental professional,* is threatening and might result in impact to human health and the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Obvious – That which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while *visually* or *physically observing the property.*

Other historical sources – Any source or sources other than those designated in 7.3.4.1-7.3.4.8 that are credible to a reasonable person and that identify past uses of the property. The term includes, but is not limited to, miscellaneous maps, newspaper archives, and records in the files and/or personal knowledge of the *property owner* and/or *occupants.*

Physical setting sources – sources that provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a *property.*

Practically reviewable – Information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the *property* without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the *property* or a geographic area in which the *property* is located are not generally *practically reviewable.* Most databases of public records are *practically reviewable* if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous facility records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not *practically reviewable* unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be

identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be *practically reviewable*. In other words, then so much data is generated that it cannot be feasibly reviewed for its impact on the *property,* it is not *practically reviewable.*

Preparer – The person preparing the *transaction screen questionnaire* pursuant to Practice E 1528, who may be either the user or the person to whom the user has delegated the preparation of the *transaction screen questionnaire.*

Publicly available – Information that is publicly available means that the source of the information allows access to the information by anyone upon request.

Reasonably ascertainable – For purposes of both this practice and Practice E 1528, information that is (1) *publicly available,* (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable.*

Recognized Environmental Conditions – the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (*1*) due to release to the environment; (*2*) under conditions indicative of a *release* to the *environment*; or (*3*) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.

Records review – That part that is contained in Section 7 of this practice addresses which records shall or may be reviewed.

Site reconnaissance – That part that is contained in Section 8 of this practice and addresses what should be done in connection with the *site visit.* The site reconnaissance includes, but is not limited to, the *site visit* done in connection with such a Phase I Environmental Site Assessment.

Site visit – The visit to the property during which observations are made constituting the *site reconnaissance* section of this practice and the *site visit* requirement of Practice E 1528.

Standard environmental record sources – Those records specified in 7.2.1.1.

Standard historical sources – Those sources of information about the history of uses of the property specified in 7.3.4.

Standard physical setting source – A current USGS 7.5-minute topographic map (if any) showing the area on which the property is located.

Standard practice(s) – The activities set forth in either and both this practice and Practice E 1528.

Standard sources – Sources of environmental, physical setting, or historical records specified in Section 7 of this practice.

Transaction screen process – The process described in Practice E 1528.

Transaction screen questionnaire – The questionnaire provided in Section 6 of Practice E 1528.

User – The party seeking to use Practice E 1528 to perform an *environmental site assessment* of the *property*. A user may include, without limitation, a purchaser of *property,* a potential tenant of *property,* an *owner* of *property,* a lender, or a property manager.

Visually and/or physically observed – During a *site visit* pursuant to Practice E 1528, or pursuant to this practice, this term means observations made by vision while walking through a *property* and the structures located on it and observations made by the sense of smell, particularly observations of noxious or foul odors. The term "walking through" is not meant to imply that disabled persons who cannot physically walk may not conduct a *site visit;* they may do so by the means at their disposal for moving through the *property* and the structures located on it.

ACRONYMS:

CERCLA – Comprehensive Environmental Response, Compensation and Liability Act of 1980 (as amended, 42 USC § 9601 *et seq.*)

CERCLIS – Comprehensive Environmental Response, Compensation and Liability Information System (maintained by EPA)

CFR – Code of Federal Regulations

CORRACTS – Facilities subject to corrective action under RCRA

EPA – United States Environmental Protection Agency

EPCRA – Emergency Planning and Community Right to Know Act (also known as SARA Title III), 42 USC § 11001 *et seq.*)

ERNS – Emergency response notification system

ESA – Environmental site assessment (different than an *environmental audit*)

FOIA – U.S. Freedom of Information Act (5 USC 552 *et seq.*)

FR – Federal Register

LUST – Leaking underground storage tank

MSDS – Material safety data sheet

NCP – National Contingency Plan

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Contact: Angela Truong

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

1212 VINE STREET
HOLLYWOOD, CA 90038

COORDINATES

Latitude (North):	34.0928410 - 34° 5' 34.22''
Longitude (West):	118.3261690 - 118° 19' 34.20''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	377657.7
UTM Y (Meters):	3773049.0
Elevation:	313 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

PACIFIC BELL TELEPHO EPA ID:: CAT080023179	***1149 N GOWER***	***ESE 1/8 - 1/4 (0.199 mi.)***	***P117***	***379***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 19 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 25 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 16 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 7 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 38 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 15 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

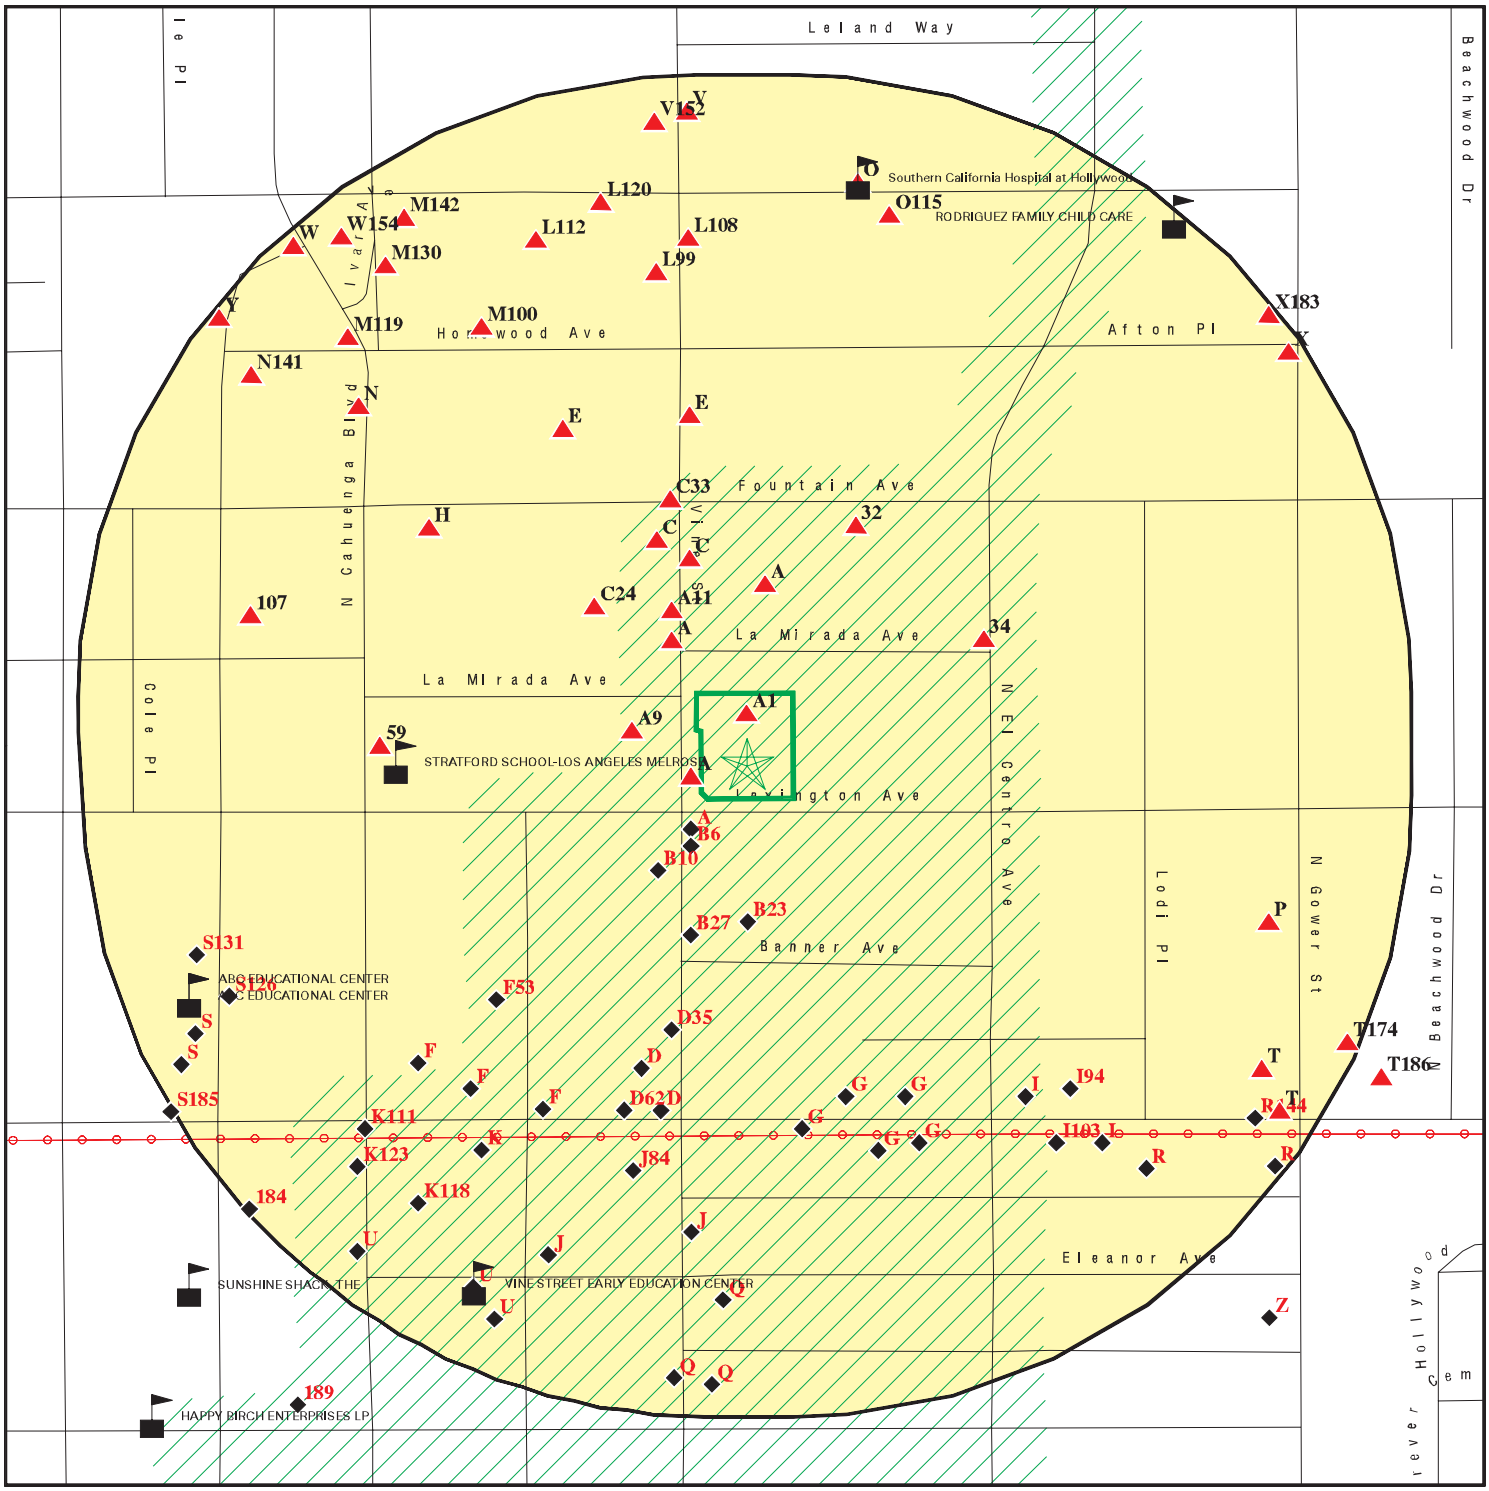
DETAIL MAP - 6169877.2S



- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- Sensitive Receptors
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Special Flood Hazard Area (1%)
- 0.2% Annual Chance Flood Hazard
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Eval Notes:	On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by WON YEE KIM. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.
