Comments for Public Posting: I'm willing to pay my fair share of taxes to keep my State a progressive State, but I do not agree to subsidize the damage that the fossil fuel companies have caused. They should be "cleaning up their messes"!

Comments for Public Posting: I encourage the Los Angeles City Council to adopt the resolution to support AB 1243 and SB 694, the Polluters Pay Climate Superfund Act of 2025. Due to climate change that is being exacerbated by fossil fuel emissions, California will continue to deal with devastating wildfires, droughts, floods, and landslides, along with massive destruction of natural habitats. Recovering from these disasters will require funding that should not come solely from the taxpayers of California. The Polluters Pay Climate Superfund Act will ensure that the largest emitters will pay their fair share for the climate damages they have caused.
