**Comments for Public Posting:** The Sepulveda Basin offleash park is a vital service for so many dog owners in this community. Any reduction in size, or impact on the parking caused by a new bike path would be devastating. This project needs to be reevaluated for its impact and include feedback from the community that uses this park. Our dogs need the space and social interaction the park provides to keep them healthy and well behaved. I fully appreciate the benefit of the revitalization the rivers and how it will improve the ecology and flood management, but it seems like the lower impact solution would to place the bike path on the south side of the river.
