Re:Support for Motion for Land Use and Legal Analysis of Setback Around Oil and Gas
Extraction in Los Angeles (Council File # 17-0447)

Dear Council President Wesson and Los Angeles City Council:

The issue of neighborhood drilling is of special concern to me. The risk to our neighbors health is undeniable.

I would like to express my support for an ordinance to establish a 2,500-foot setback separating oil and gas extraction operations from sensitive land uses like homes, schools and hospitals.

I would also like to express support for the motion introduced on April 19, 2017 (Council File # 17-0447) directing the City Attorney, Petroleum Administrator and Department of Planning to perform a legal and land use study of such an ordinance. I applaud the leadership of Council President Wesson introducing this motion and to Councilmembers Bonin, Cedillo, Harris-Dawson, Koretz, and Martinez for co-sponsoring the motion.

It is clear that oil drilling operations are wholly incompatible with residential neighborhoods, and I urge the Council to act swiftly to pass the motion for a legal and land use study as an important step toward alleviating the harm that front-line communities experience daily. Every Angeleno deserves to live in a safe, healthy neighborhood.

Thank you for your attention and action on matters that directly impact the health and safety of residents living near oil drilling operations.

Please contact me if you have any questions or would like additional information.

Sincerely,

Kristy Pace

RE: Support for Motion for Land Use and Legal Analysis of Setback Around Oil and Gas Extraction in Los Angeles (Council File #17-0447)

Dear Council President Wesson and Los Angeles City Council.

As a resident of Los Angeles, I am writing to express concern about the issue of neighborhood drilling in our city. In light of our current knowledge of climate change, and the city's commitment to moving toward a more livable, sustainable and economically vibrant city powered by clean energy, I strongly believe that neighborhood drilling is at odds with our vision of Los Angeles as a clean city.

Therefore, I would like to express my wholehearted support for an ordinance to establish a 2,500 ft. setback separating oil and gas extraction operations from sensitive land uses like homes, schools and hospitals. I would also like to express support for the motion introduced on April 19, 2017 (Council File #17-0447) directing the City Attorney, Petroleum Administrator and Department of Planning to perform a legal and land use study of such an ordinance. I applaud the leadership of Council President Wesson in introducing this motion and to Councilmembers Bonin, Cedillo, Harris-Dawson, Koretz, and Martinez for co-sponsoring the motion.

I am concerned about environmental justice issues for the communities around oil and gas extraction operations. These generally lower-income communities bear the brunt of harm from these toxic extractive industries. Creating the proposed setback would help to ameliorate the many health hazards faced by these neighborhoods.

It is clear that oil drilling operations are wholly incompatible with residential neighborhoods, and I urge the Council to act swiftly to pass the motion for a legal and land use study as an important step toward alleviating the harm that front-line communities experience daily. Every Angeleno deserves to live in a safe, healthy neighborhood.

Thank you for your attention and action on matters that directly impact the health and safety of residents living near oil drilling operations.

Sincerely,
Polly Chu
